A detailed black and white line-art illustration of an industrial factory. In the upper left, a large flywheel is visible. To its right, a worker in a hard hat and safety vest is working on a machine. Below the flywheel, a worker wearing safety goggles is shown in profile, looking towards the right. In the lower left, a worker with a beard and hard hat holds a clipboard. The background features various industrial components like pipes, tanks, and a recycling symbol on a machine. The overall style is technical and industrial.

# LINEA LIGHT GROUP

From the time of its establishment in 1985 to the present, Linea Light Group has grown to the point of becoming and being known as one of the major players in technical and decorative lighting. These two spirits co-exist and fuel one another thanks to the group's constant and continuous technological research.

With the recent acquisition of the historic Stilnovo brand, famous for its innovative and experimental products, Linea Light Group's decorative range is enriched. From Stilnovo, we inherited lighting items designed by Ettore Sottsass and De Pas D'urbino Lomazzi, as well as Joe Colombo, and we brought new lights alongside these icons, developed entirely in-house. The acquisition completes the Decòrative collection made up of products with great personality and a strong dramatic presence.

Linea Light Group simultaneously maintains its presence as a leader in professional lighting with the i-LèD brand, acknowledged as one of the major innovators in the LED area. From 2019, we have been in the urban & industrial lighting segment with dedicated products, reinforcing our presence in the technical lighting market with efficient and innovative products.

The completeness of our catalogues allows us to be present and active on diversified sales channels, so we are able to supply all our customers optimally and quickly. Precision, speed and reliability are the characteristics that have always defined Linea Light Group.

# INTERNATIONAL COMPANY

Three production hubs to guarantee  
tailored global service at the disposal of  
lighting professionals

-  Headquarter
-  Hub-Branches
-  Branches

Linea Light Group is a unique group specialised in a diverse range of domains within the world of lighting. It is independent yet coordinated at the same time. Its formula allows for the creation of complete, unique solutions in any given context: from integrated systems for large residential or public buildings to outdoors or underwater lighting; from home environments to commercial, industrial, institutional or public spaces.

Linea Light Group stands out thanks to a market approach that is attentive to specific requirements and to the demands of local partners. Its "Think Global, Act Local" vision focusses on making connections between different areas and on managing services from a shorter distance. Today, Linea Light Group is a company with a strong international presence and an extensive network: wherever their projects may take them, their partners will be right by their side.

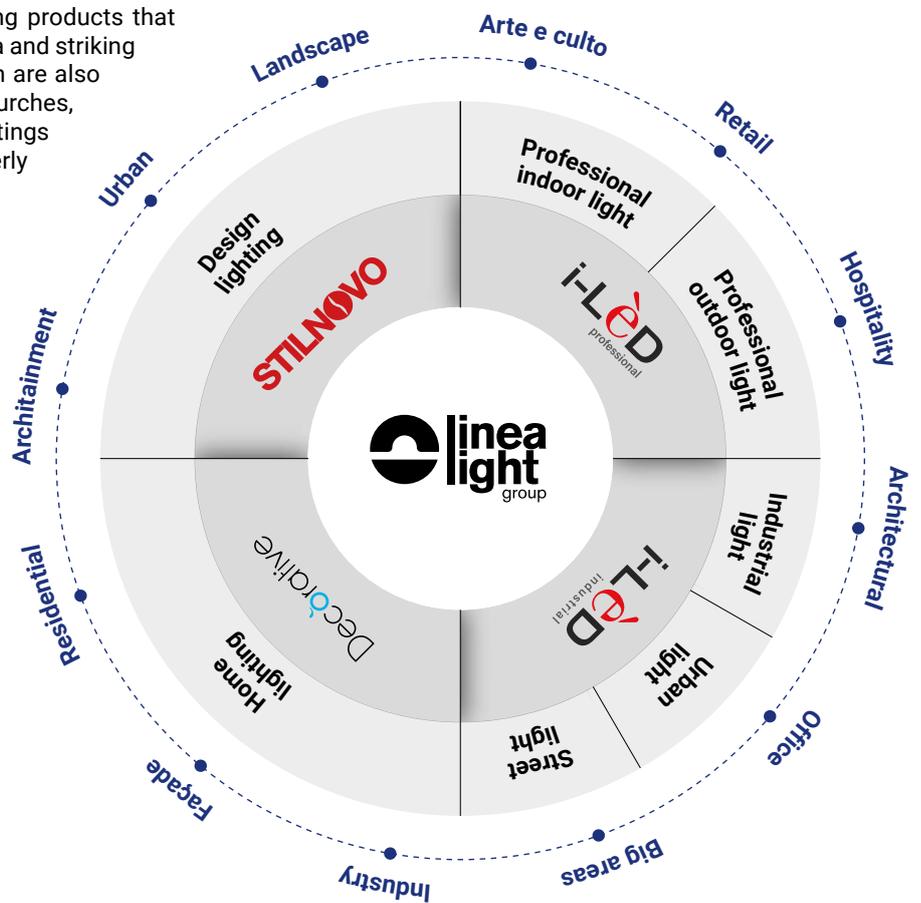

## LIGHT UP

### MULTI-LEVEL APPROACH

For us, the word ILLUMINATE has a profound meaning. It has an important effect on our daily lives, one which encapsulates a whole host of meanings and applications: our mission is to lend a voice to all these differences. This is why Linea Light Group expresses itself in different collections capable of solving the lighting solutions sought by our partners. Starting with our **i-LéD** brand, specialising in professional and industrial products, as well as the **Decorative** brand with its modern, decorative collection, along with **STILNOVO** whose timeless products were designed by masters of past and present design. There are additional **levels of specialisation** within each brand, featuring products that allow us not only to light up the multimedia and striking facades of modern architecture but which are also capable of respectfully “hiding” inside churches, museums and all those historical settings that need to be protected from often overly intrusive light.

## NEW

### OUTSIDE THE BOX

The world of lighting thrives not only on technology and innovation but also on a static and repetitive approach. Decor companies focus exclusively on the shape and design while professional companies focus on function and performance. Linea Light Group, however, takes an “across-the-board” approach, a **NEW** way of thinking about the product which leaves freedom of action and expression to the creativity of our R&D team. They are experts in micro-electronics, geometric optics, material science, digital information technology, as well as being mechanical prototype designers and specialised turners, interacting daily with fashion designers, supermarket managers, directors of major hotel chains and, obviously, professionals such as architects and lighting designers, succeeding in inventing innovative products in terms of technology and application. Our experimental approach is applied to different fields: new ideas and strategies are applied to logistics, finance, planning, to the choice of machinery and production processes, and even sales methods as a whole.

**1** All production waste is cleaned with a specific de-oiler which separates oil and chip, reintroducing these materials into the production supply chain.

**2** Automated warehouse consisting of 21,000 drawers for storing components and small parts. With high energy efficiency, the autostore optimises the throughput and speed of picking operations.

## IDEAS!

### PRAGMATISM

We are the kind of people who like to get “**our hands dirty**” and “**make products**”. We are down-to-earth, yet friendly and open-minded individuals. We like inviting professionals into our home and taking them into our favourite room - not the reception room, but rather the “**kitchen**”! Showcasing the “**factory**” is a not only source of immense pride for us but also the best way for our guest to understand the many potentials of our company, putting all our knowledge and technology (as well as our best technicians) at their disposal to bring their **DESIGN IDEAS** to life.

**3** Manual lathe used to create prototypes and one-off pieces.

# MICRO-DRIVER

# NOW THE DRIVER IS ON BOARD! ALL THE i-LèD TECHNOLOGY IN THE PALM OF YOUR HAND.

Linea Light Group has created the first minispots with built-in driver. We have studied and created luminaires that, despite being able to fit in the palm of your hand, maintain the performance expected from our products. The new minispots do not require the use of remote power supplies during installation. They are carefully designed and contain the best, and smallest, technology available. The built-in driver, integrated in the body of the luminaire, can be switched to different configurations, such as Up-Light, Path-Markers and Accent Lighting. The new luminaires are extremely compact and have a steel body ideal for outdoor installation thanks to a high protection rating (IP67). Linea Light Group has provided professionals with different fixtures suitable for different uses, even the most demanding. Easy, fast and well-made are the three qualities that define the new technological frontier reached by Linea Light Group.

# STANDARD SPOT + DRIVER INSTALLATION

Scale 1:1

# NEW SPOT WITH BUILT-IN DRIVER

With its innovations, Linea Light Group has simplified, and speeded up, the work of professionals and installers. We have designed compact, essential and high-performance luminaires which, thanks to the complete integration of the driver into the body of the luminaire, eliminate the need for external power supplies. We have concentrated the best electronic technology and the best performance in just a few centimetres.

Scale 1:1

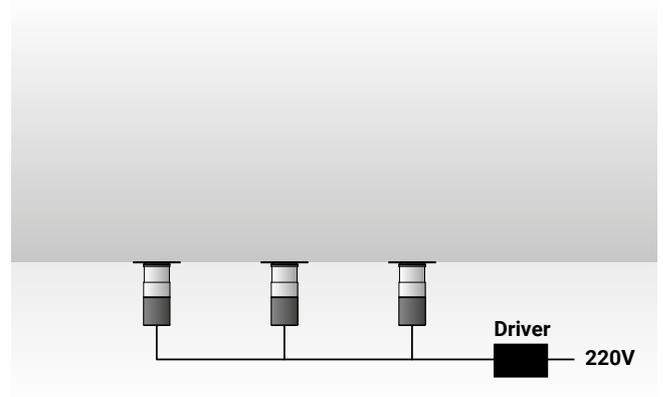

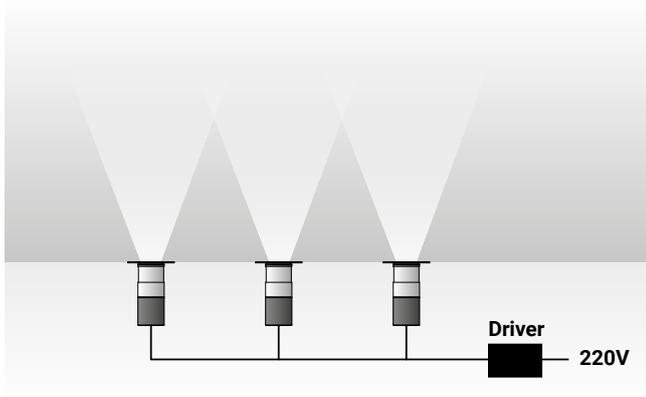

# SYSTEM INSTALLATION, MANAGEMENT AND INTEGRATION: IT ALL BECOMES EASIER

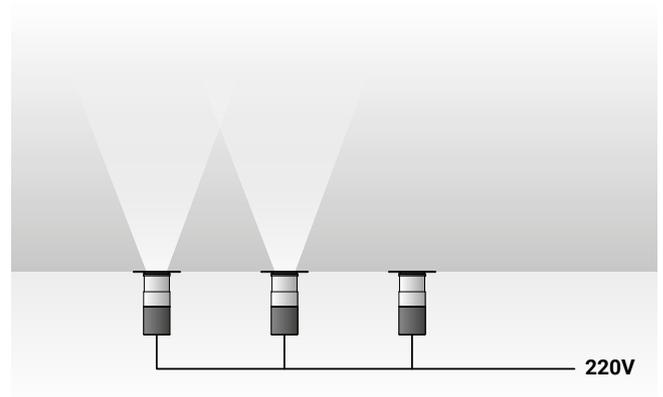

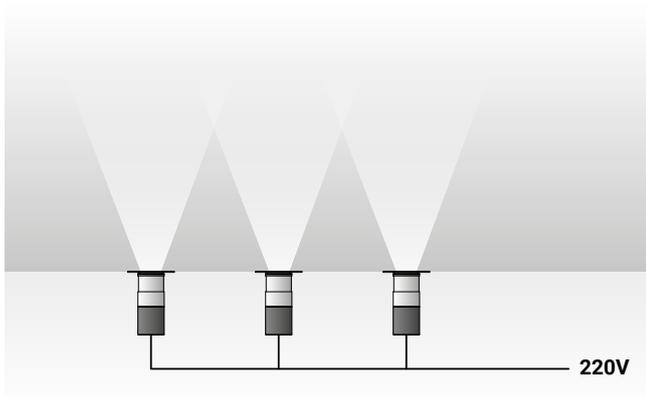

Easy and quick installation are the advantages of our new luminaires. Each assembly and design phase is simplified and speeded up thanks to the built-in driver. The big news is the size: for the first time, the driver has been built into ultra-compact luminaires. This solution makes it easier to design and implement lighting systems, even in complex or sensitive contexts. The new built-in driver system allows for much longer light lines to be installed, compared to the use of remote drivers. The lack of voltage drops is the greatest advantage of the new luminaires. If a single spot is not working properly or goes out, the line remains fully

active and when the faulty luminaire is replaced the perfect continuity of the system is restored. Another advantage is the fact that it can be easily integrated into an existing system. Each luminaire can be managed independently of the main power supply. Fast and well-made is the new Linea Light group operating paradigm. The technological innovation includes eight product families: Alcor, Suelo, Beret, Quara, Step, Clivo, Shaker and Periskop. All designed for specific installations and with high performance qualities. Up-Light, Path-Markers or Accent Lighting: each configuration is easy to install and maintain.

If a remote driver fails, the entire system goes out.

When the driver is built into the product, the lighting system keeps working even in the event of a fault. By replacing the single luminaire, the system will be fully operational again.

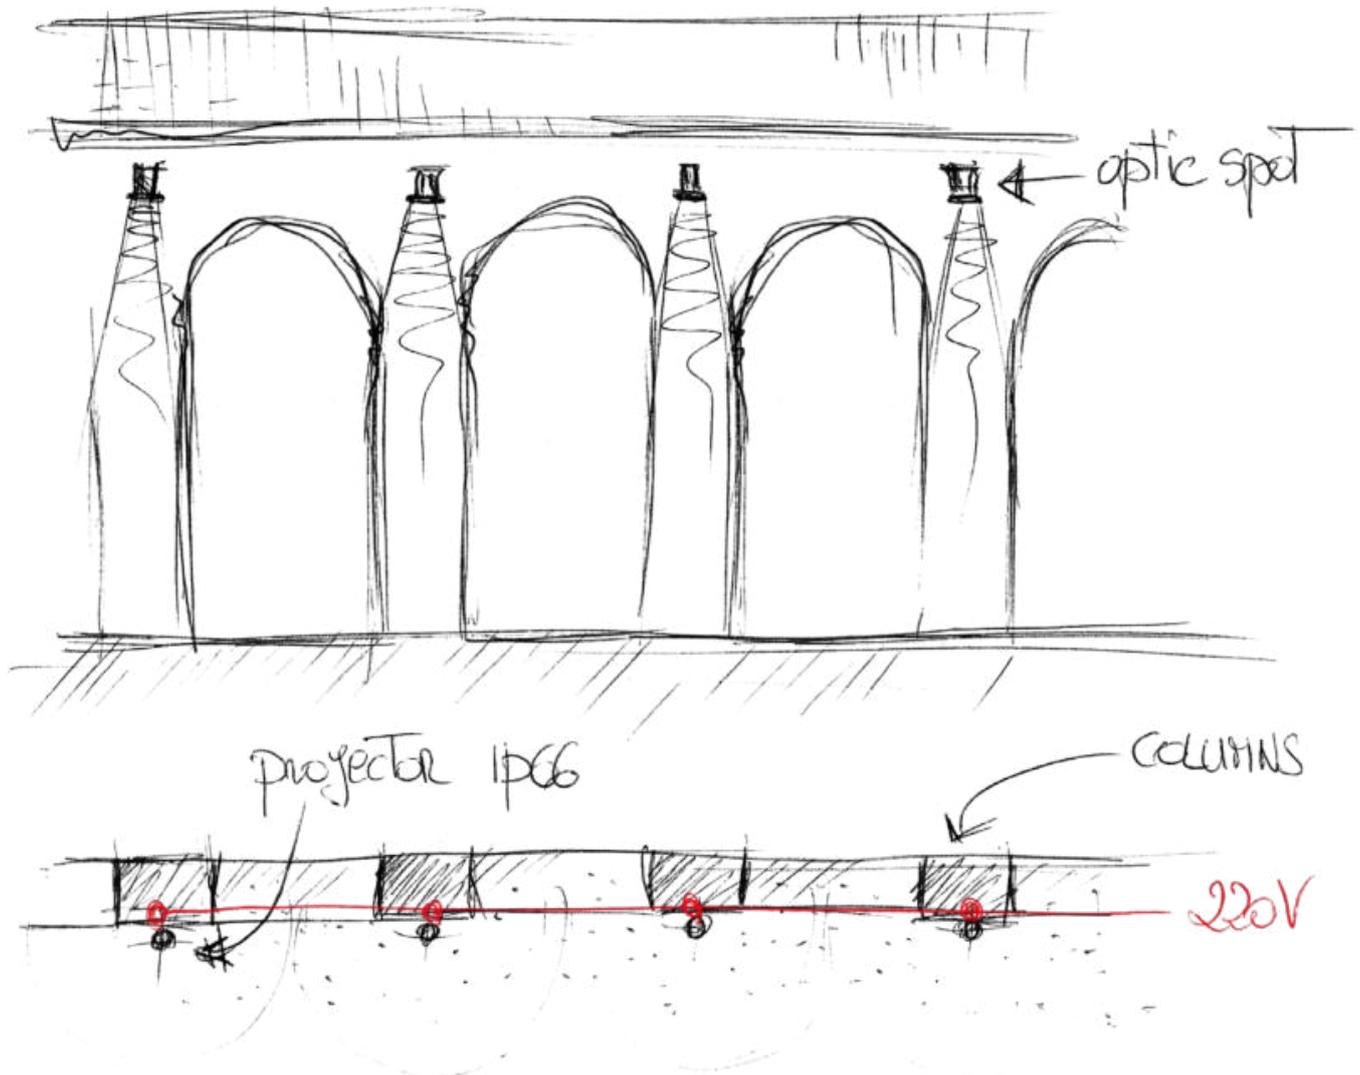

# MAXIMUM DESIGN VERSATILITY

The new Linea Light Group spots with built-in driver are easy to install, making it possible to operate easily and quickly even in complex contexts such as historical-artistic ones. In terms of installation, everything is extremely easy. There is no longer need for a junction box to contain all the system's power supply units. In delicate and architecturally valuable contexts this is a decisive factor, since, in many cases, it is not possible to built a complex system like those found in

new buildings. The new luminaires with built-in driver are ideal for accent lighting or to gently highlight architecturally important details.

An important advantage is the possibility to create very long light lines. The design and wiring of the system becomes easier and faster, reducing connection and maintenance time and costs. Two important factors that make our products competitive, without compromising on performance and efficiency.

# INDOOR

**BATON**

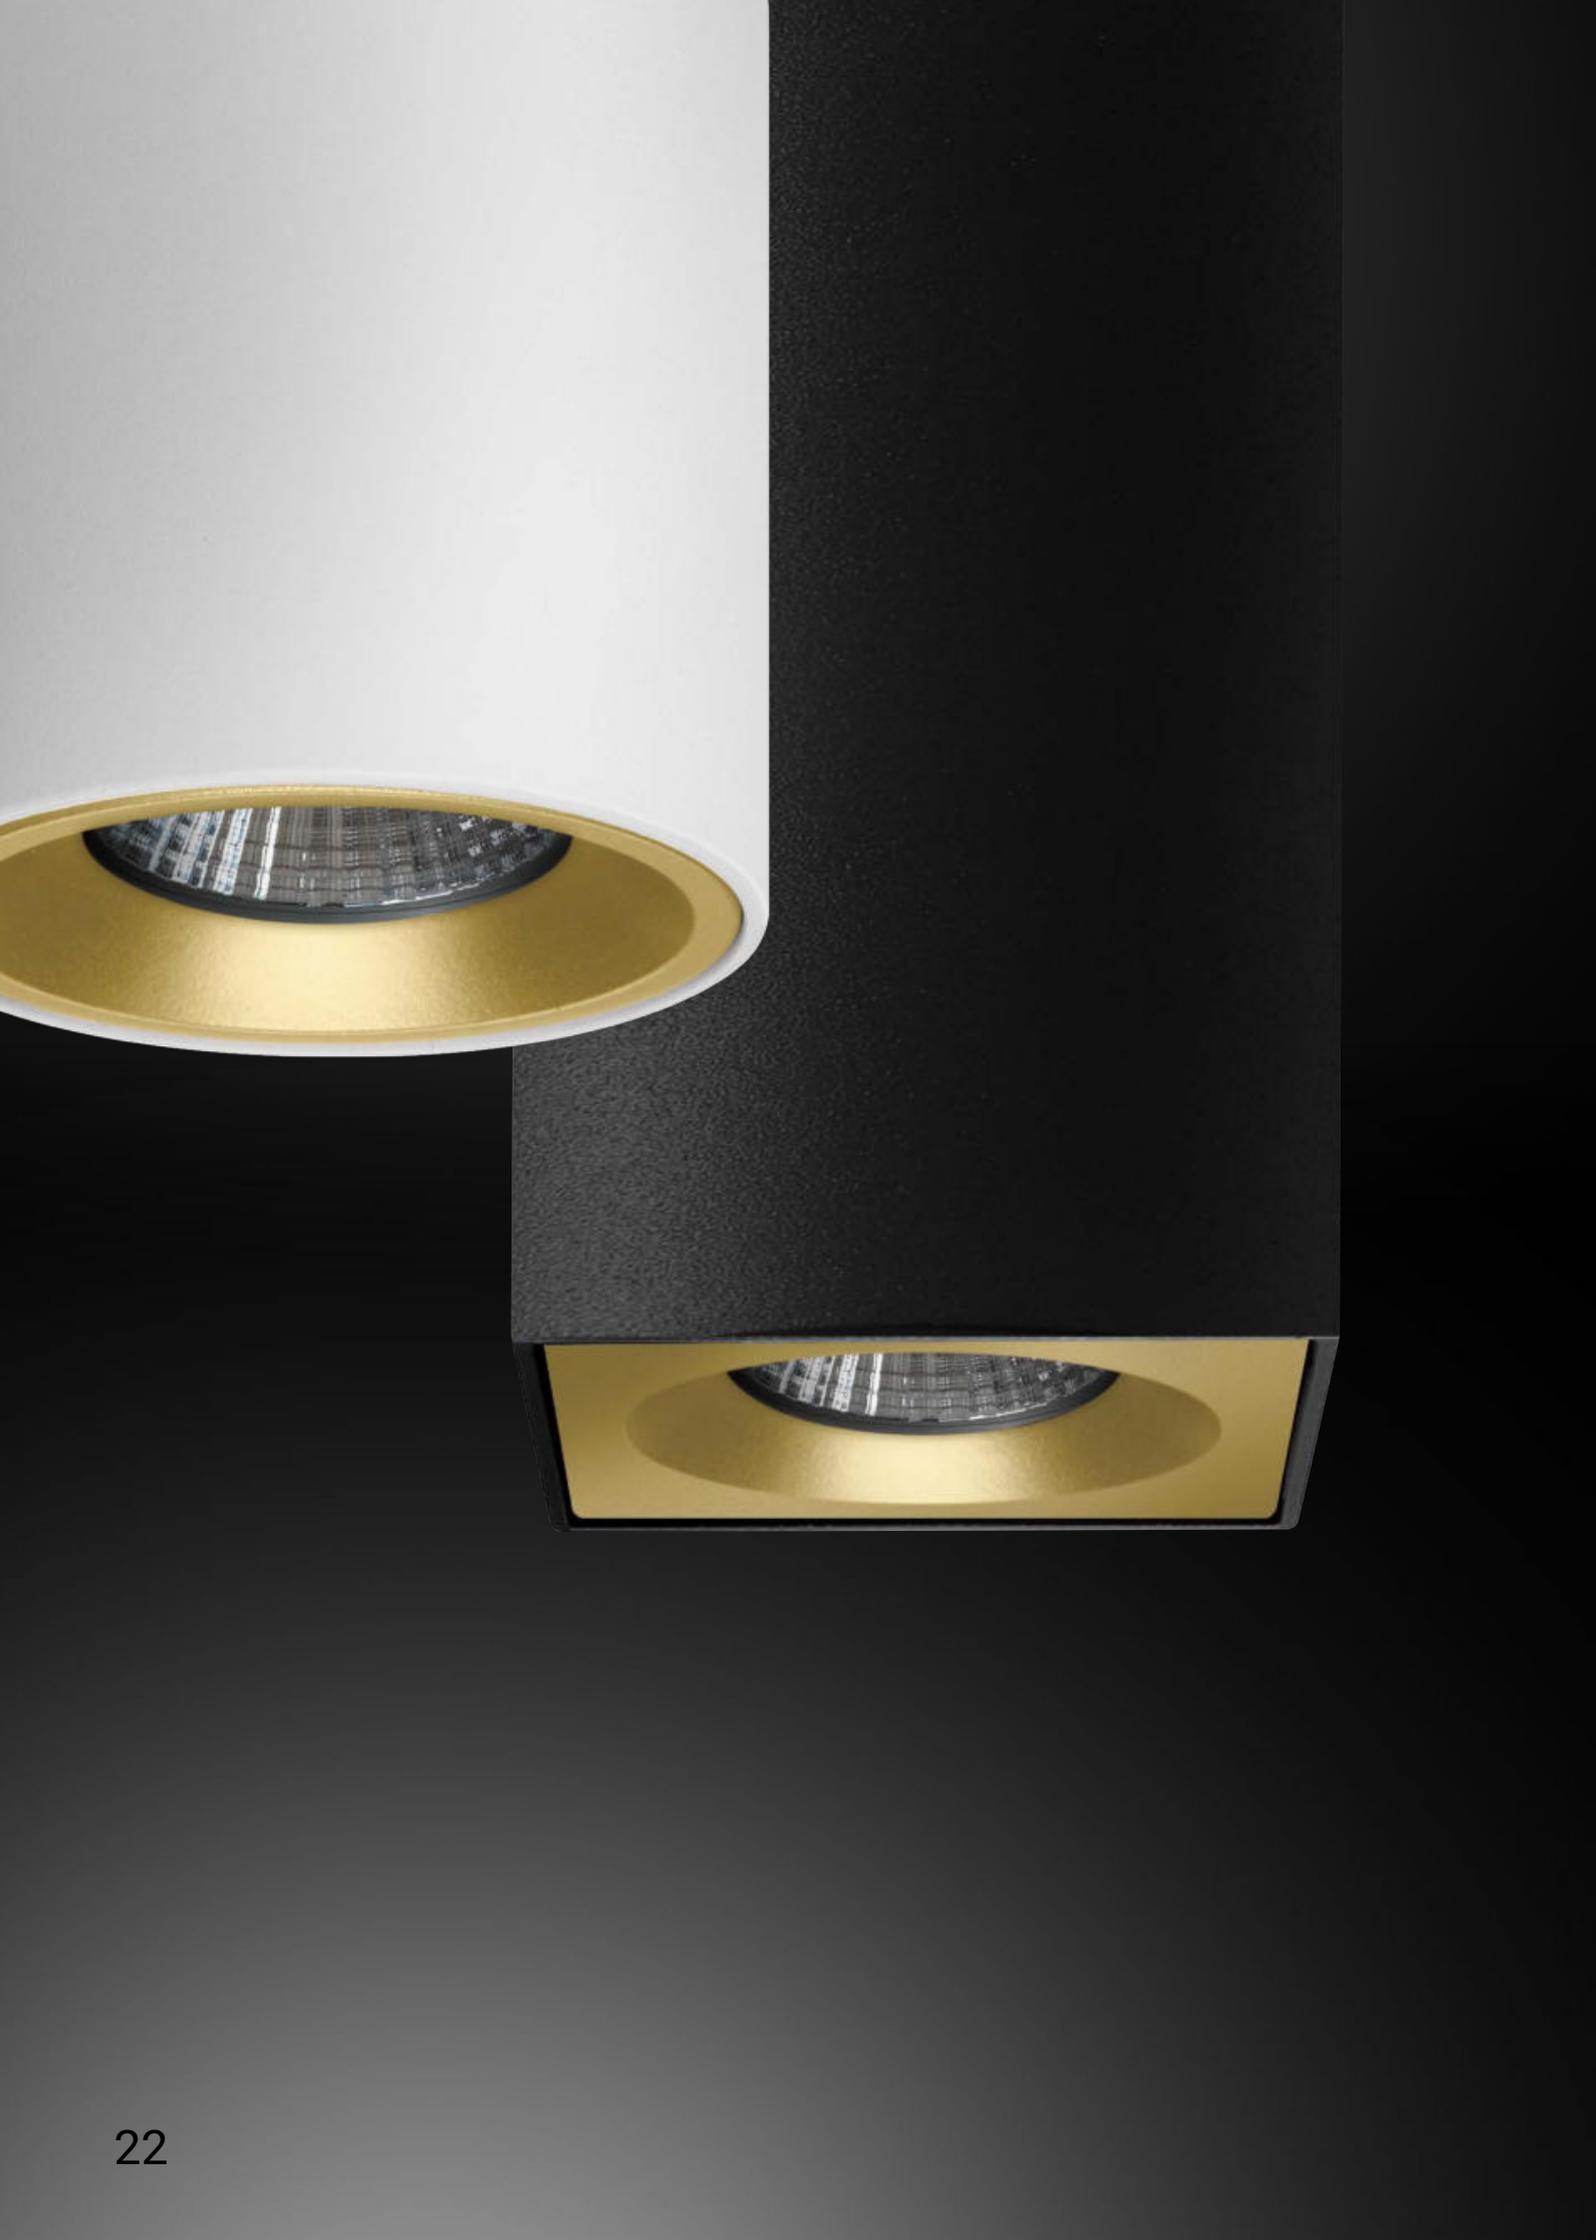

**CONFIGURATION  
AND COMFORT**

# NEW OPTICS GROUP FOR GREATER DESIGN VERSATILITY

The Baton family introduces new high-performing LEDs CRI 92 and a new optics group consisting of a reflector in aluminium with three different angles of light distribution. Baton is aimed at designers, offering lighting performance and high visual comfort thanks to the rearward position of the LED circuit, ensuring glare control with  $UGR \leq 16$ . Two geometric shapes,

cylindrical and parallelepiped, and two possibilities for installation, either ceiling-mounted or suspended. Baton is extremely minimal if used alone, but can become incredibly scenic if combined in a multiple composition with the various available models.

# ATTENTION TO DETAIL

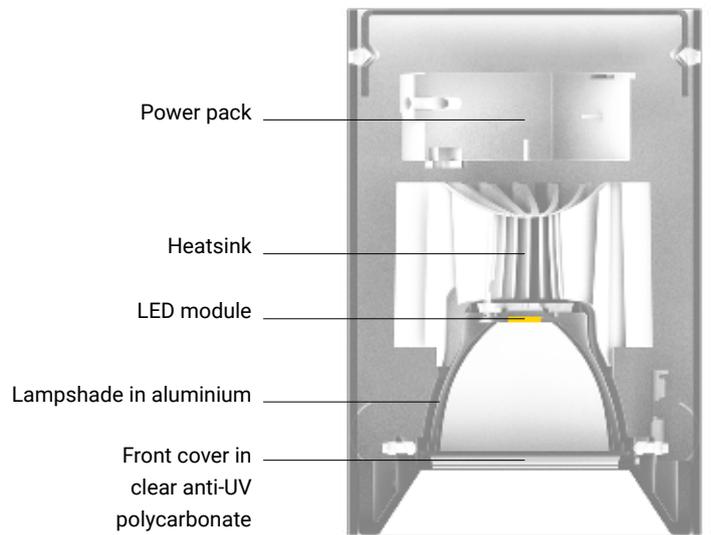

The fixtures are made in aluminium and powder coated in either matt white or matt black, perfectly blending into the architectural space. The optics compartment is characterised by an aesthetic element ensuring the high visual comfort of Baton.

## TECHNOLOGICAL CORE

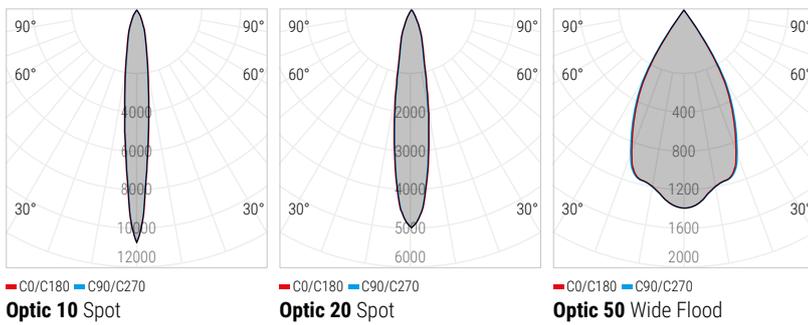

Technology dressed up in a sober and understated design, in one word, Baton.

# TOUR SLIM

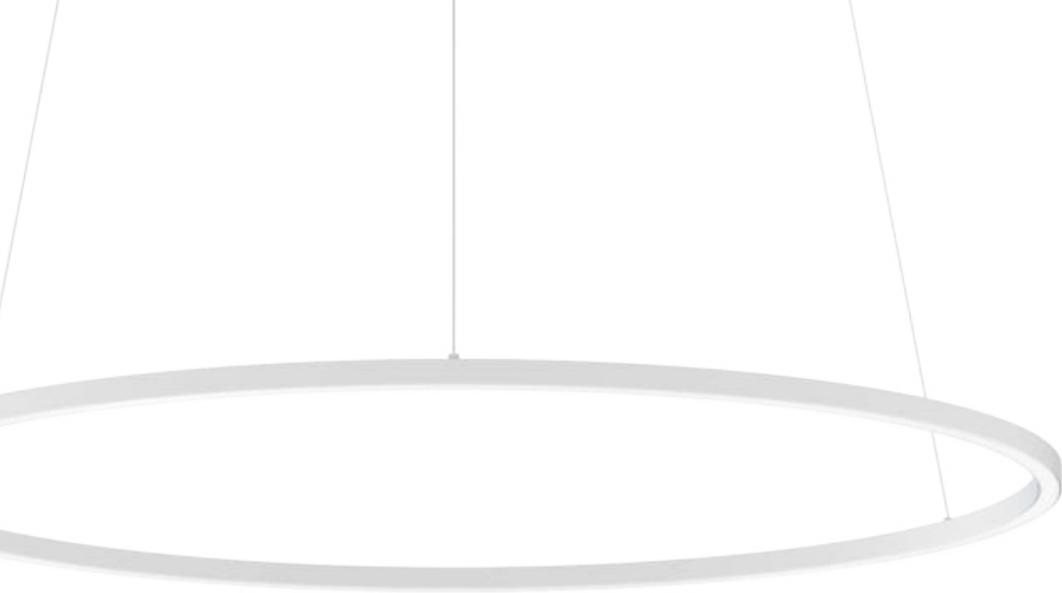

# WE HAVE OUTDONE OURSELVES WITH THE NEW SUPER SLIM PROFILE

Tour Slim is the new idea of a slimline circular profile for lighting residential and contract spaces. We have worked on the dimensions and performance. Tour Slim has a cross-section measuring just 29x29 mm with a high level of visual comfort thanks to the flat diffuser extruded and curved into a single piece. The light is diffused and directed onto the surface without any lateral dispersion. The collection includes five diameters (Ø550, 700, 900, 1150 and 1450 mm) and two suspension methods; a Complete version is also included for the 550 and 700 mm diameters. The four finishes available strike the ideal balance between elegance and lightness.

Scale 1:1  
profile Tour Slim

29 mm

# IMPERCEPTIBLE PRESENCE

Thanks to its slimline profile, Tour Slim fits discretely into any living space. Only a soft, well-defined light is perceived thus ensuring excellent visual comfort. The collection features two suspension methods: a central ceiling rose and fastening kit. The central ceiling rose, including the power source, supports the three cables. The kit includes three ceiling nipples with a remote

driver for greater visual appeal. This solution makes it easier to create layouts with multiple lights. Tour Slim is available in three temperature colours: 2700K, 3000K and 4000K which meet a variety of design and installation requirements. The combination of all these elements makes the collection extremely flexible and versatile, and easily adaptable to different settings.

## House DG | Vicenza, Italy

What is truly striking in the living area is the double height of the space, exalted through the installation of three Tour Slim suspension lights at different heights and with varying diameters, all embellished with gold finishes. The final effect is that of a play of light, a refined dynamism that underscores the elegance of this part of the house.

**Architectural project and lighting design:**

### **Aria Wellbeing Retreat & SPA | Como, Italy**

Moving on to the resort's interior, the idea behind the overall design was to create warm, welcoming and very luxurious spaces. The suspension lights, in particular, can be found in various installations throughout the living areas of the suites bearing gold finish and colour temperature of 2700K.

# PERFECTLY BALANCED VISUAL HARMONY

Tour Slim is the ideal collection for the design of large, airy spaces. The different diameters and finishes help to create original and unexpected layouts which are always and never the same. There are numerous layout combinations possibilities based on a play on contrasts and balances, plus angles and heights. Tour Slim allows for excellent freedom of movement and interpretation of the space. Thanks to its slim profile and the lightness of the suspension cables, designers can always invent new and personalised solutions.

# DIMENSIONS AND COLOURS FOR UNEXPECTED LAYOUTS

**Tour Slim**  
Ø 1150 mm

**Tour Slim**  
Ø 1450 mm

We have come up with four elegant, understated finishes: white and embossed black, brushed gold and copper. Tour Slim also has a strong technical component, such as the flush-fit, perfectly uniform opaline diffuser which gives the collection excellent visual comfort, avoiding any glare or lateral dispersion. The timely management of the devices completes the technological potential of the family. Thanks to DALI, DALI2 digital and 1-10v analogue protocols, Push-Dimm, Phase-Cut it is possible to control each pendant light, its function and manage the production of specific lighting scenes.

# CEILING ROSE OR FASTENING KIT AND REMOTE DRIVER - TAKE YOUR PICK

Tour Slim offers designers two options, plus one for installation. The central ceiling rose with three cables, including the power supply, is available in two sizes: Ø175 mm with 50W and 70W power, on/off, DALI, 1-10V, Phase-cut, Push Dimm or Ø300 mm with 100W and 150W power, On/off, DALI 2, Phase Cut, Push Dimm. The fastening kit consists of three ceiling nipples that fasten the support and power cables while the driver is positioned remotely. These three solutions allow a great deal of freedom of expression, with room for a wide variety of combinations of heights, angles and diameters with the finishes.

## INSTALLATION EXAMPLES

Here are some examples of the creative design of Tour Slim among the many that have been invented by you. Symmetrical or asymmetrical, concentrically converging or diverging cascades. Why not have a go!

# ROLLIP35: COMFORT JUST GOT SLIM

Rollip35\_MP is an extremely versatile modular suspension system designed to illuminate workstations in offices. The minimal and compact double emission structure is made from extruded aluminium and houses high-luminance LED modules. In direct emission, the new roll diffuser guarantees glare control with  $UGR \leq 19$ . The system offers designers dedicated modules with DALI2 protocol, and the possibility to efficiently adapt the brightness to the different work environments.

Scale 1:1

# COMFORT LIGHT FOR BETTER LIFE

# ROLLIP35\_MP A SYSTEM OF ENDLESS POSSIBILITIES

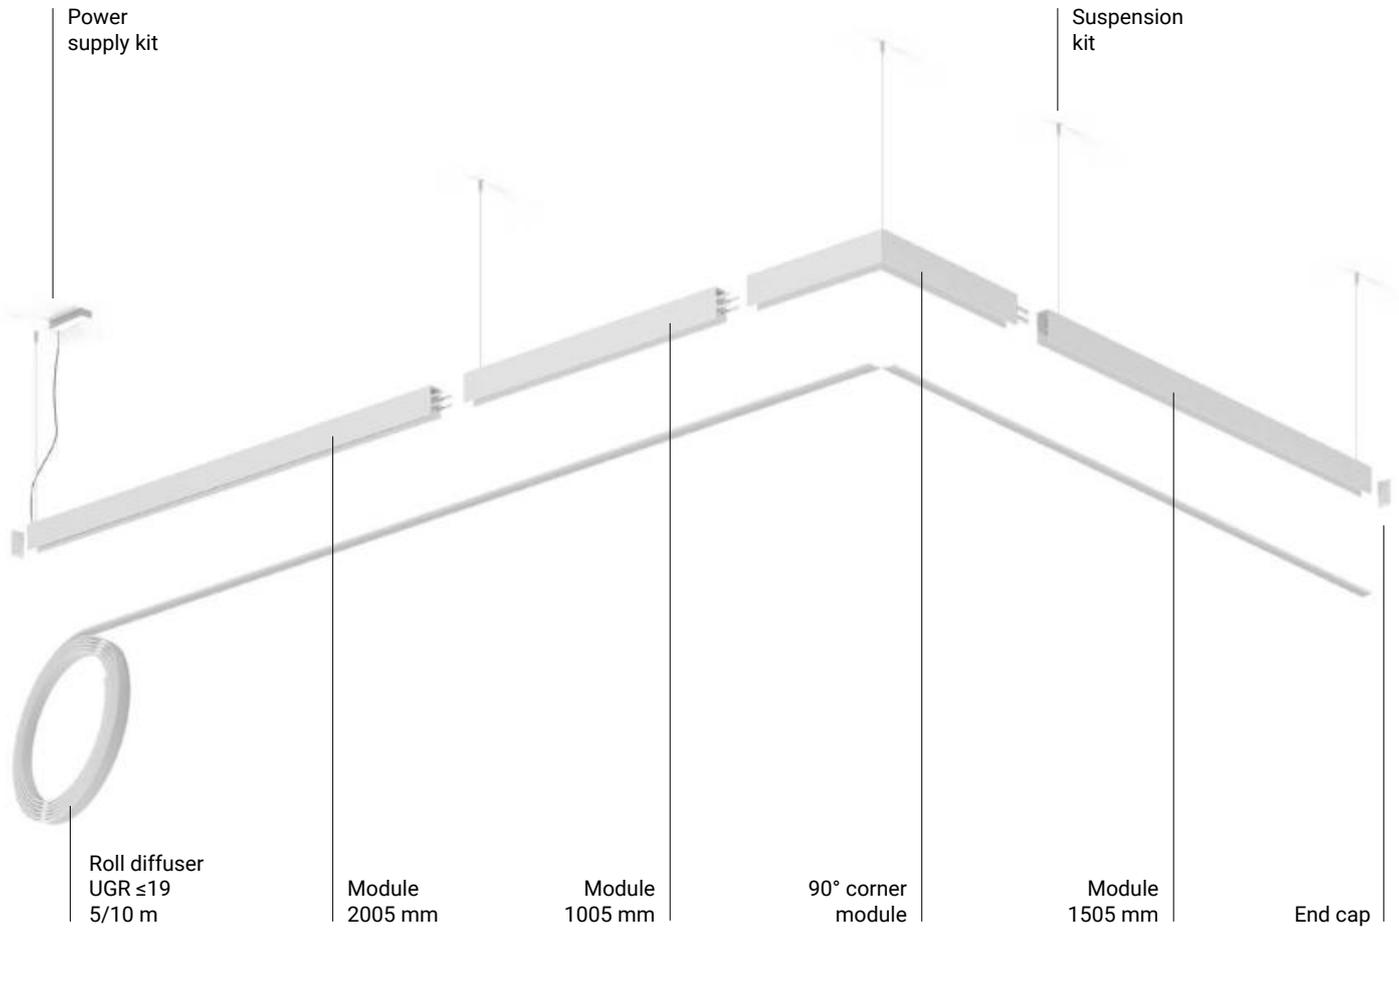

Rollip35\_MP perfectly blends into the architecture and offers endless possibilities for installation, guaranteeing correct lighting in workstations, supported by excellent visual comfort.

## CONTINUOUS UNINTERRUPTED LIGHT

The facilitated installation of the roll diffuser allows the development of continuous, uninterrupted lines up to 10 metres long in a single, simple assembly process.

### Visual comfort

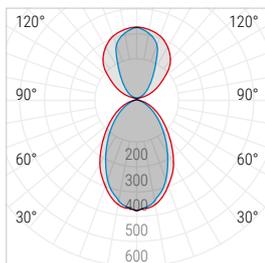

The Rollip\_MP system is designed to guarantee visual comfort and UGR values compliant with workplace legislation.

# NAVATA

# MAXIMUM VERSATILITY IN EVERY SPACE

The Navata system expands its range of accessories with new, extremely compact bases to offer designers all the benefits of the flexibility making Navata unique to its kind.

# INTEGRATED CONTROL SYSTEMS FOR FLEXIBLE LIGHT

The new base with integrated power pack has been designed to allow light fixtures in the Navata collection to be positioned in all restricted architectural contexts, for example cornices, mouldings or nooks. Despite its compact size, the base of the projector houses On/Off, DALI and DALI PUSH configurations.

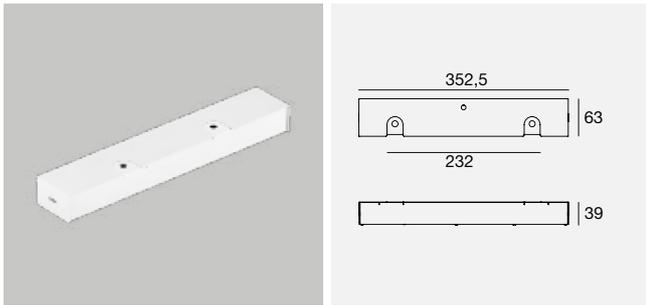

Standard base for double projector.  
Size 352x63 mm H39 mm

New base for single projector.  
Size 164x94 mm H39mm

**Base** | On/Off | 198 - 264 V AC | 300mA - 1050mA

- WH** 99938 From 11 to 38 W DC
- BK** 99943 From 11 to 38 W DC
- SN** 83055 From 11 to 38 W DC

**Base** | DALI | 198 - 264 V AC | 300mA - 1050mA

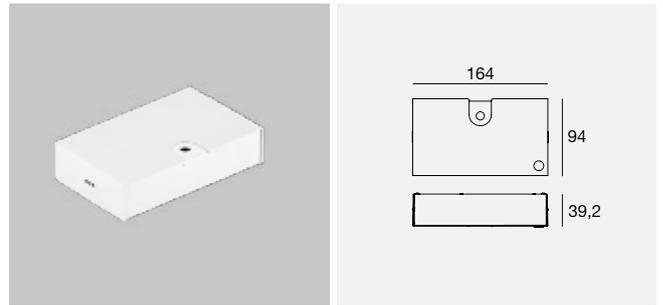

- WH** 99936 From 11 to 38 W DC
- BK** 99941 From 11 to 38 W DC
- SN** 83054 From 11 to 38 W DC

**RTG:** 83055 - 83054

- BK** 99951 From 11 to 38 W DC
- SN** 83051 From 11 to 38 W DC

**Base** | On/Off | 198 - 264 V AC | 300mA - 1050mA

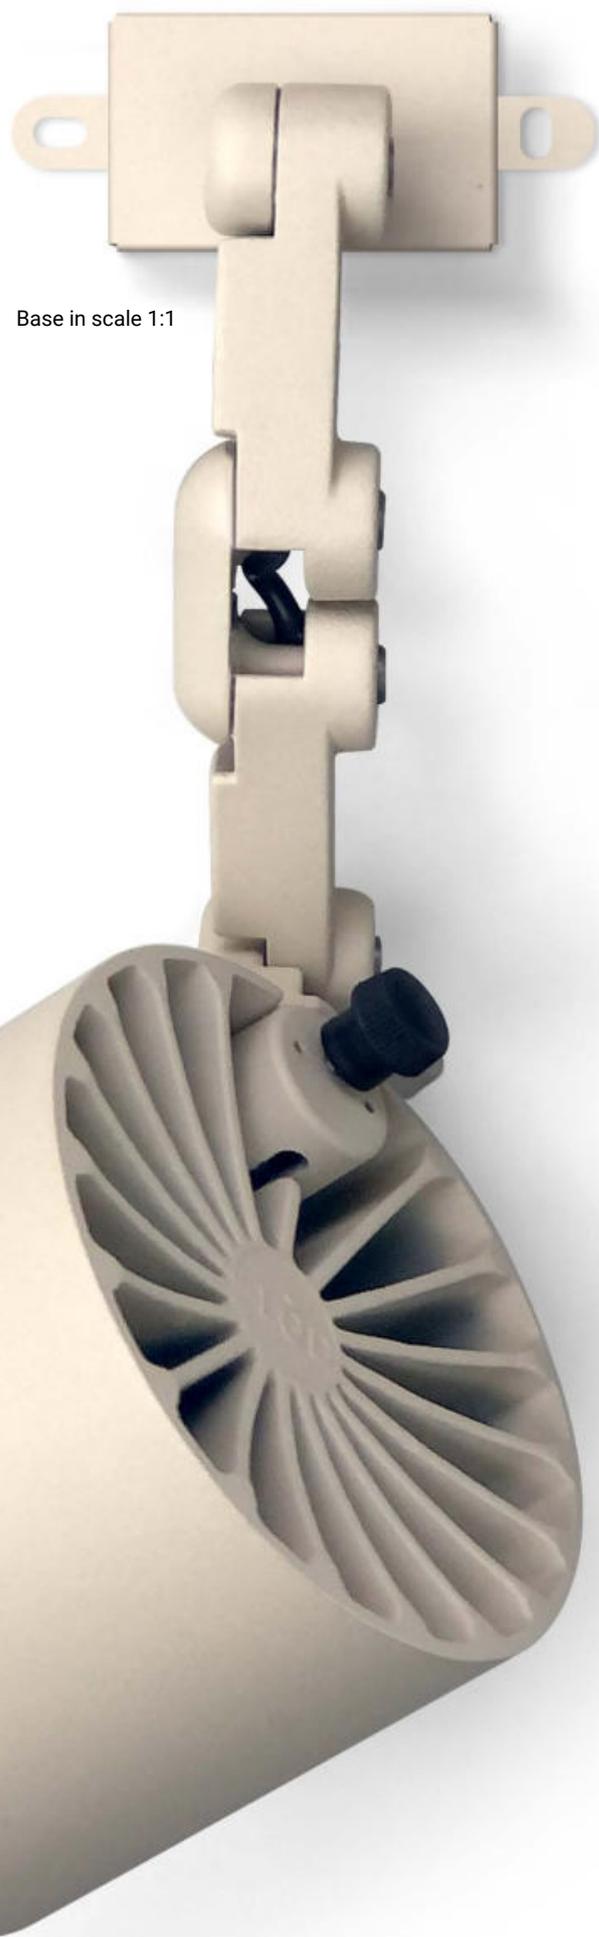

- WH** 99948 From 11 to 38 W DC
- BK** 99953 From 11 to 38 W DC
- SN** 83052 From 11 to 38 W DC

# NEW MICRO BASE

The new base with remote power pack has been designed to allow light fixtures in the Navata collection to be positioned in all restricted architectural contexts, for example cornices or narrow overhangs.

It measures a mere 52x32mm with a height of 20mm, and is available in three different finishes, white, black and sand, to be completed with dedicated electronics with On/Off, DALI and DALI PUSH control.

## INSTALLATION POSSIBILITIES

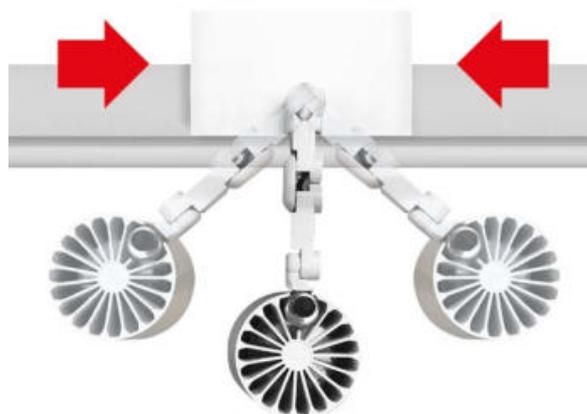

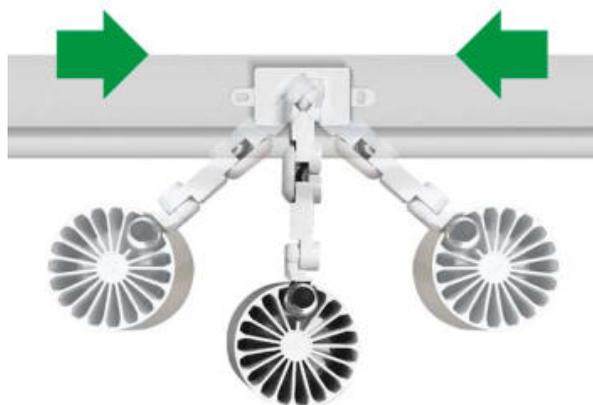

Cornice-mounted

Wall-mounted

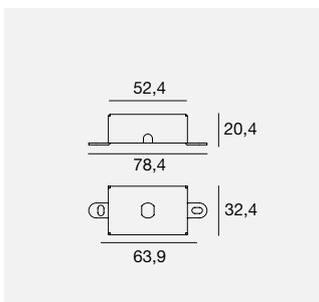

Ceiling-mounted

The base with remote power pack allows all luminaires in the Navata series to be installed in all contexts where space is limited.

# OUTDOOR

# D-WAVE

# MAXIMUM DESIGN FLEXIBILITY, EVEN IMPOSSIBLE ONES

With D-WAVE we have created the first flexible two-axis lighting system. We have given the impossible a chance. D-WAVE is the new frontier in linear outdoor marker lights. Thanks to the extreme flexibility of the fully recyclable composite material, it can be adapted to any perimeter, even the most complex and winding ones. The internal pass-through compartments, along the entire length, make it possible to insert wiring, for example, and keep it protected. At the front, various flexible linear light sources can be inserted, such as our Rubber 2D, Rubber 3D, PU\_C Plus and Silicone\_C. Rubber 3D light sources allow you to take full advantage of the double curvature.

## Two-axis flexibility

D-WAVE is a system with the highest flexibility and adaptability available on the market. Its cross-section, studied in every detail, allows both zenithal and lateral bending, which allows D-WAVE to overcome any obstacle or embrace any path. The extruded profile, studied in every detail, can have an endless range of customisations thanks to its extreme ductility. The illumination of contemporary architecture, even the most complex and articulated, will always find its correct solution.

## Zenithal flexibility

## Lateral flexibility (can only be used with Rubber 3D)

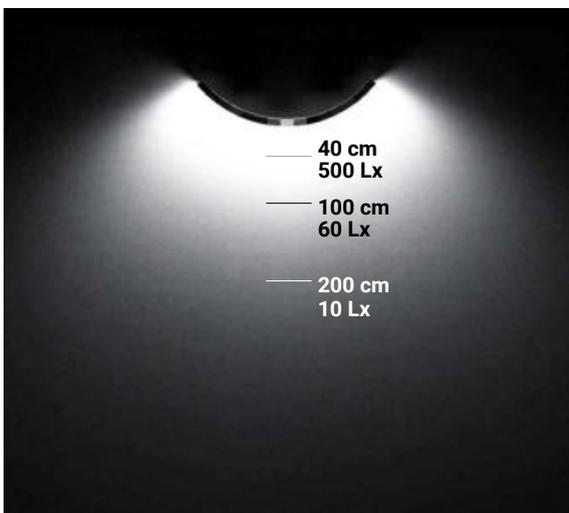

# A BLADE OF LIGHT THAT SINUOUSLY ILLUMINATES THE GROUND

**D-Wave +**  
Rubber 3D  
10 W/m | 2700K

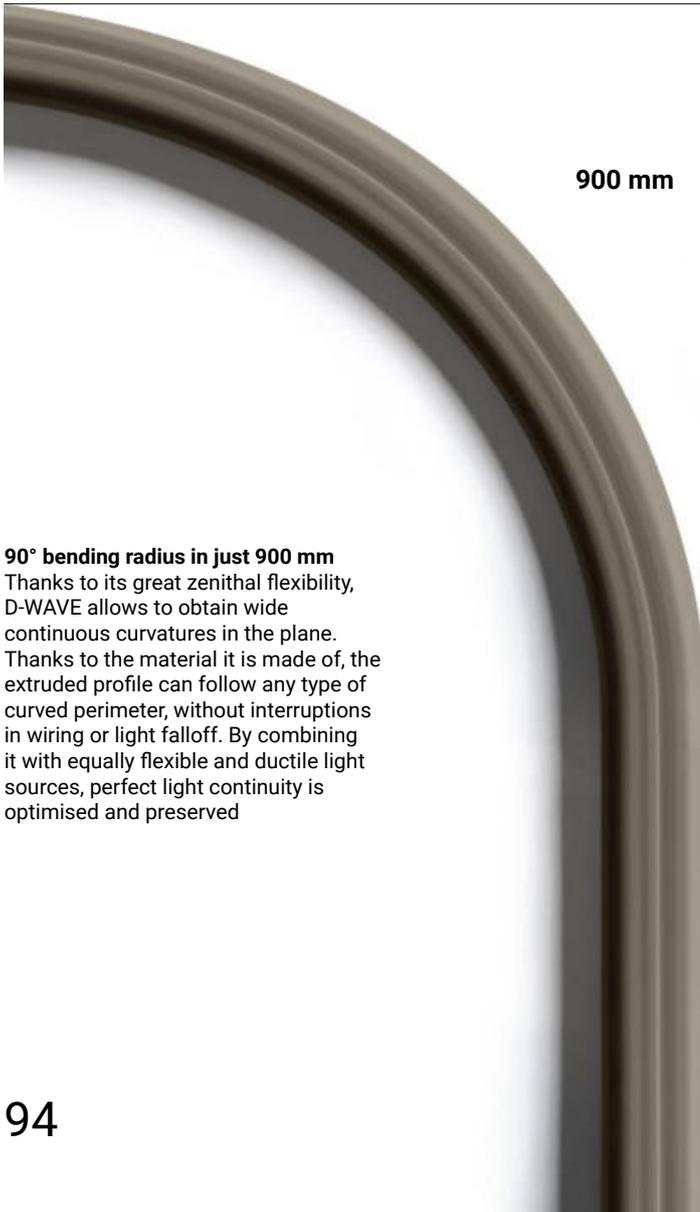

# BORN FOR THE FUTURE: RECYCLABLE AND CUSTOMISABLE

D-WAVE is a profile designed in every detail to meet all of the designer's needs. The base is designed to accommodate the fastening systems provided: bracket and stake. Two anchoring methods that facilitate installation by adapting to the perimeter to be followed. Engraved on the base is the Recycle 3 logo, which allows the type of material to be recognised for proper recycling.

900 mm

900 mm

## 90° bending radius in just 900 mm

Thanks to its great zenithal flexibility, D-WAVE allows to obtain wide continuous curvatures in the plane. Thanks to the material it is made of, the extruded profile can follow any type of curved perimeter, without interruptions in wiring or light falloff. By combining it with equally flexible and ductile light sources, perfect light continuity is optimised and preserved

## 90° angle connection cuts

D-WAVE is available in 2-metre long modules. D-WAVE can be cut anywhere, even at 90° angles, thanks to the special angular joint, and it can be connected in perfect aesthetic and functional continuity. This solution offers two major advantages: work can be carried out with millimetric precision, without losing efficiency, and the brightness can be maintained constant along the entire perimeter

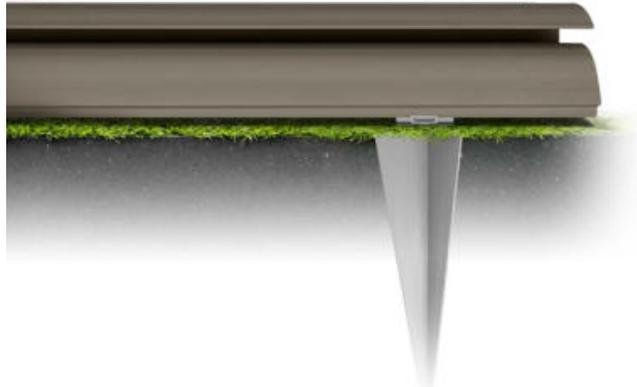

**Floor mounting**

Thanks to the quick-release steel bracket, D-WAVE can be mounted on any floor. Positioned at a 50 cm pitch, the bracket ensures firm and continuous anchoring over the entire length of the luminaire

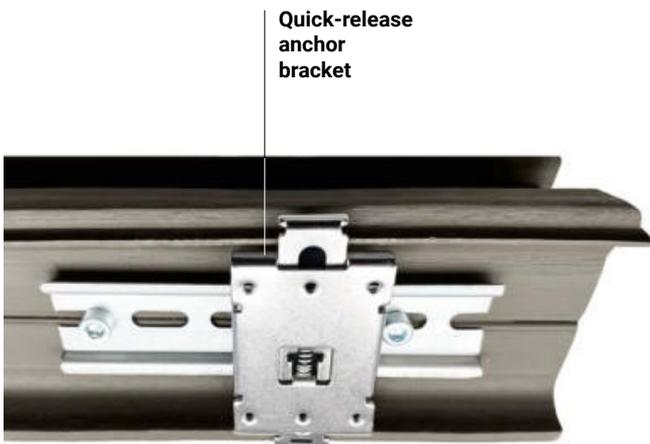

**Ground mounting**

For this type of installation, a small steel stake has been provided, which is also adjustable and can be placed at a certain pitch, ensuring continuous and safe anchoring over the entire length of the perimeter

**Quick-release bracket**

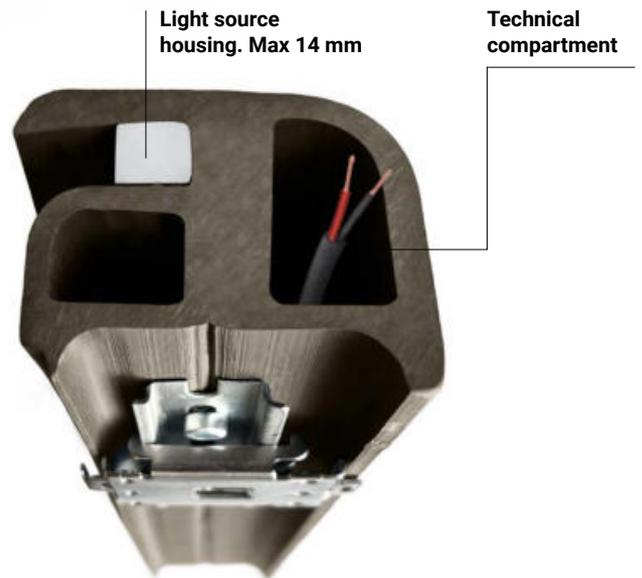

We have designed a quick-release bracket system. This is ideal in case of maintenance, replacement or relocation of the luminaire. Thanks to the rear lever, the bracket is quickly released from the profile, leaving it free, thus facilitating the planned operations

Quick-release anchor bracket

**All-in-one**

D-WAVE is an all-in-one extruded profile that contains the light source in the front channel: Rubber 3D, Rubber 2D, Ribbon\_PU C Plus or Silicon\_C, all the wiring required for your project is protected in the rear channel. The duct passing under the light source is used to support the lighting profile inserted. All the technological components that make up the D-WAVE system are housed in a single profile

Light source housing. Max 14 mm

Technical compartment

**Connecting element**

We have designed an invisible connecting element that contributes to the maximum aesthetic and functional continuity of D WAVE. The intermediate joint, linear or angular, allows for the continuous passage of cables and light sources without interruptions or falloff

**Anchor brackets**

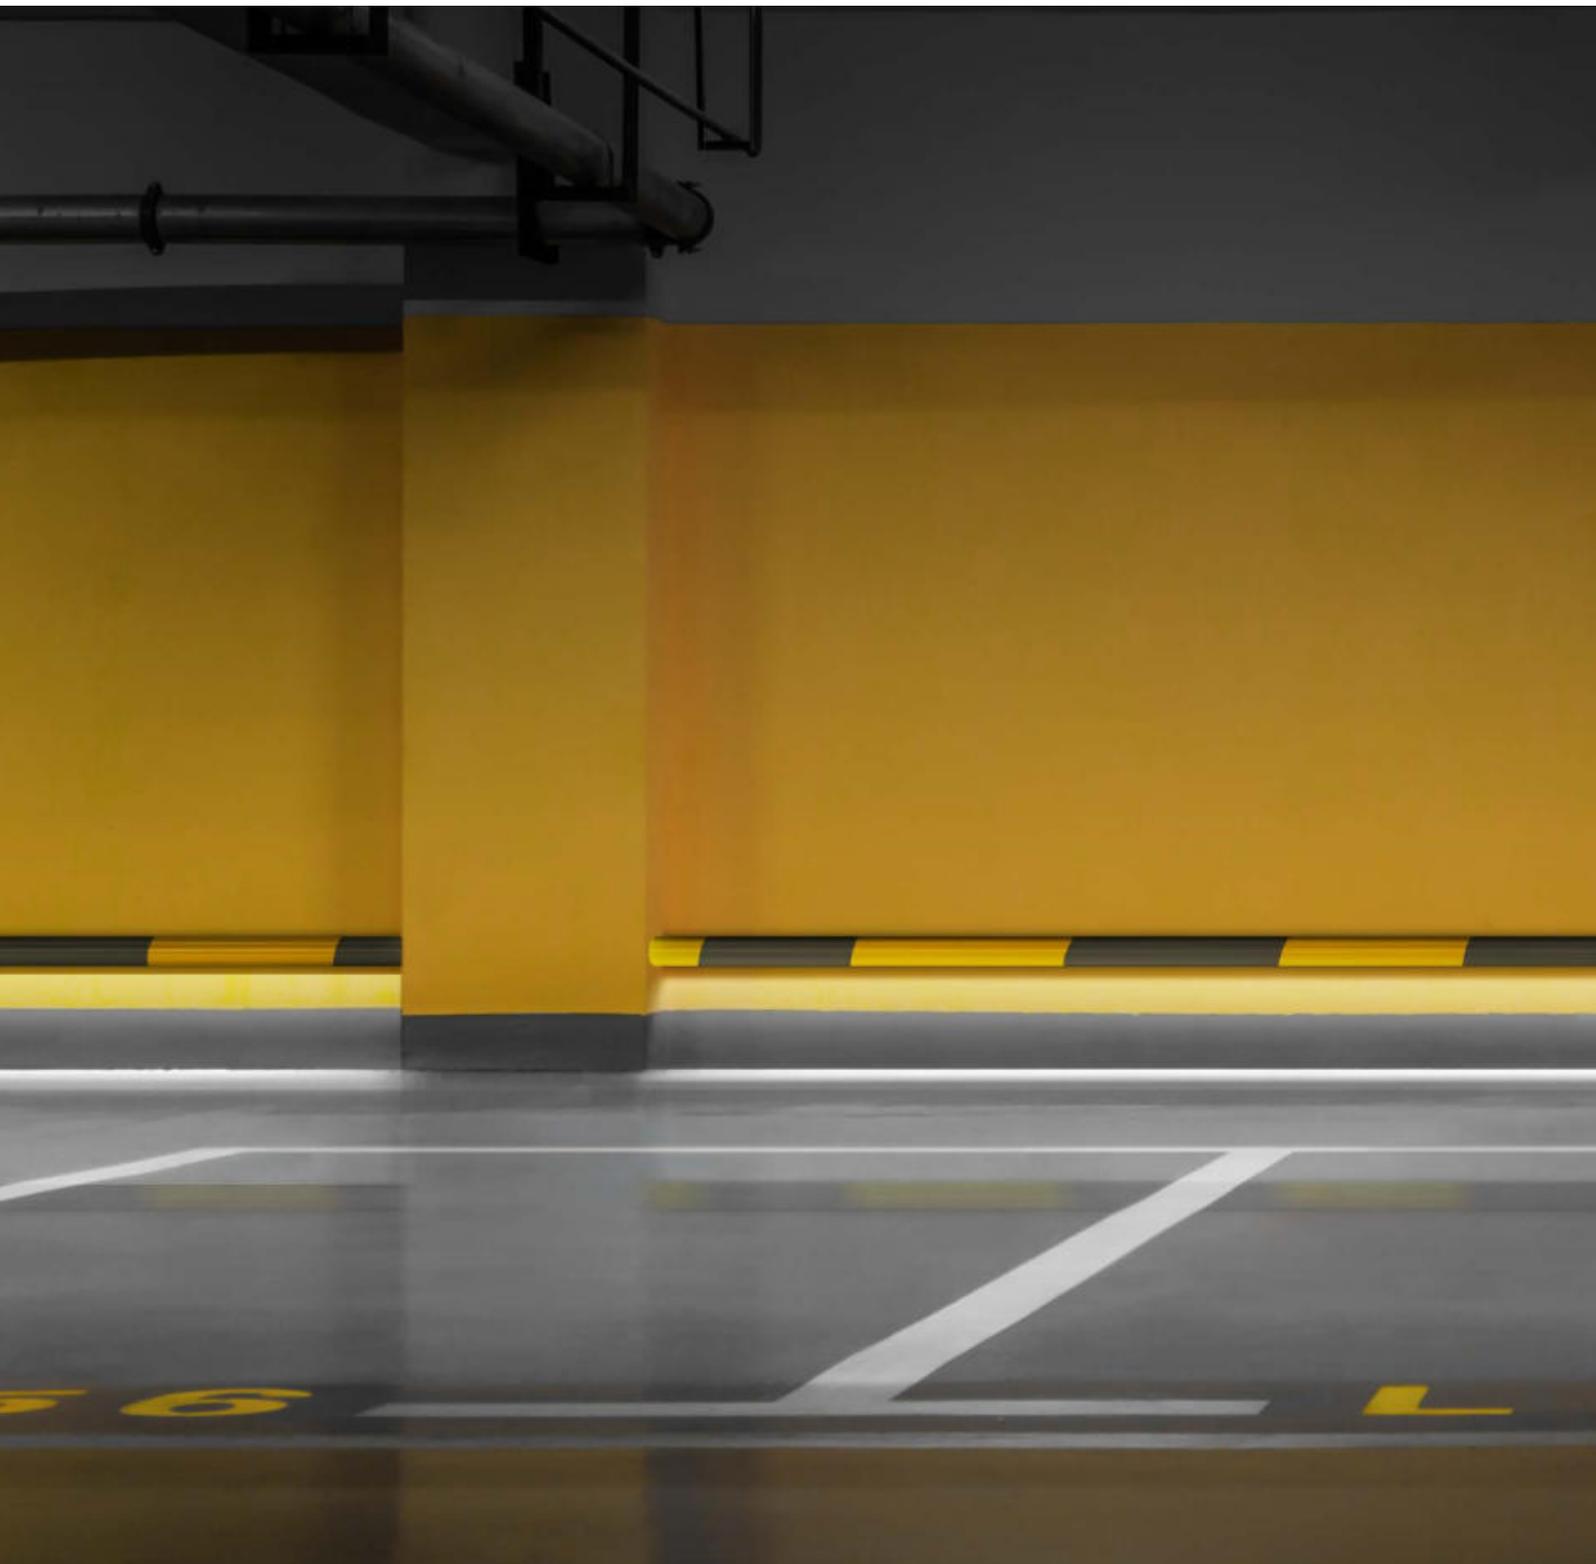

Positioned every 50 cm, they ensure secure and stable installation on any floor or ground and with any zenithal or lateral curvature. The brackets guarantee completely safe installation in any location and in all surface conditions

**Closing element**

The end element that closes D-WAVE completes the marker light, making it perfectly unified and continuous along the entire length. An essential accessory from a functional and aesthetic point of view

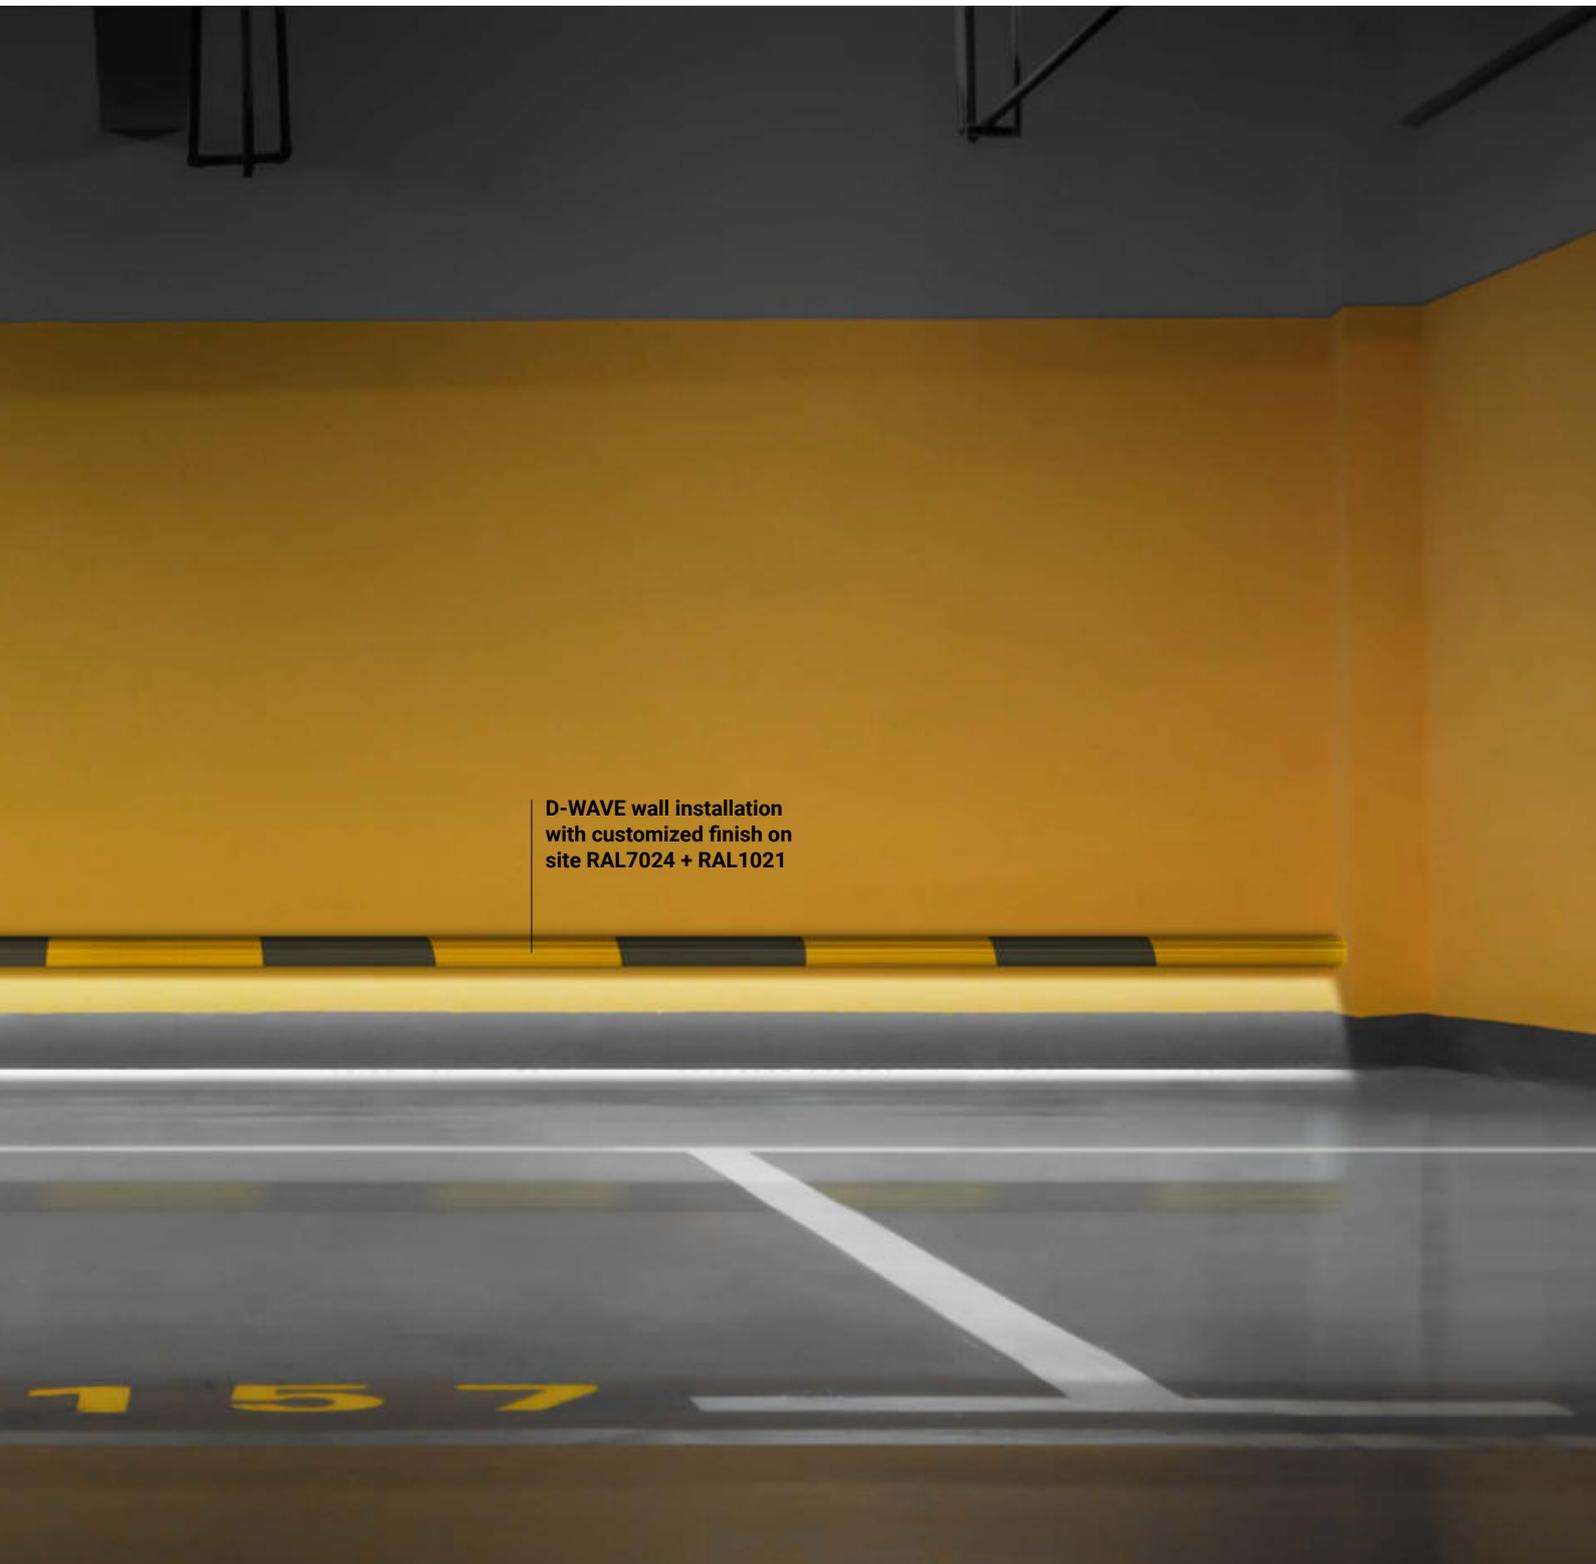

2000 mm

#### **Customization on site**

The material D-WAVE is made of is easily customisable, whatever colour you need for your projects. Thanks to the special construction material, paint adheres easily to the entire surface (use only paints for plastic materials). Let your creativity run wild with D WAVE!

# ADAPTABLE IN ANY CONTEXT

Beret is an extremely compact recessed up-light, with an IP67 protection rating. The power supply is built into the structure, so it can be connected directly to the power line. It is available in two shapes, round and square, with a flange of just 35mm, and in six different finishes: white, grey, chrome, brushed nickel, AISI 316 L steel and natural brass, to offer unprecedented compositional possibilities and five types of distribution angles.

PRODUCT**

## Easy installation

The casings designed for SUELO RX Pro simplify the connection of the luminaires to the power line, thus reducing installation time. The screws anchor SUELO RX Pro to the casing structure, guaranteeing safety and solidity.

# ORMA

220-240 V

# ALL THE TECHNOLOGY COMBINED IN 51 MILLIMETRES

The Orma family has evolved, presenting a luminaire with an extremely small fixture, just 51 millimetres thick, which can be directly connected to the mains without the need for external power sources, allowing easier and faster installation. Its performance remains unaltered as do the materials used, all sturdy and reliable. It is available in two diameters, 97 millimetres and 138 millimetres, two powers, 7W and 11.5W, two colour temperatures, 3000K and 4000K, with high-performing optics with beam angles: Spot, Flood, Wide Flood, Diffused.

## UPLIGHTS OR DOWNLIGHTS, SIMPLY CHOOSE WHERE TO INSTALL THEM

For greater design expression, Orma can be installed on false ceilings, or directly on ceilings with the appropriate formwork, or alternatively on the ground with the special outer casing guaranteeing maximum stability over time.

**ORMA\_Q**

# ALL THE ORMA TECHNOLOGY ENCAPSULATED IN A NEW SQUARE SHAPE

The Orma family has been joined by Orma\_Q, a new collection of recessed luminaires with a square shape and compact sizes, ideal when the installation space is limited. It features a black, anodised die-cast aluminium body, AISI 316 stainless steel flanges and toughened and screen-printed glass. High degrees of protection: IK10 and temporary IP68.

# THE RANGE

In addition to the embossed steel square flange, the range is enriched by an all-glass flush front for versions with optics. Moreover, the tilting versions can also be easily and quickly oriented by turning the appropriate screw with a slotted screwdriver, without having to open the lamp body and risk compromising its watertightness.

# CUBIT: THE PROTAGONISTS OF YOUR PROJECTS

CUBIT is an essential luminaire that becomes the protagonist of your lighting project thanks to its extremely clean aesthetics. Its formal simplicity conceals sophisticated, cutting-edge technology in terms of lighting, optics and performance. The lower optical cell is recessed and without glass in the PRO version; this allows the light to expand at its best without dazzling. The different combinations provided allow the designer to work with a wide range of possibilities, playing with symmetries and openings. CUBIT can illustrate a place by emphasising the distinctive architectural elements of a building, or it can transform an urban landscape by adding luminous signs or patterns on vertical surfaces.

**Cubit\_Pro**  
114x114 11W AC  
3000K  
Single Emission  
Spot (Cell)

# FOUR DIMENSIONS FOR ENDLESS LIGHT EFFECTS

134x134x133 mm

114x114x113 mm

## OPTICS **CUBIT** SINGLE EMISSION

**15** Spot  
**30** Flood  
**60** W.Flood  
**12** E.W.Flood  
**00** Diffused

## OPTICS **CUBIT** DOUBLE EMISSION

**15+15** Spot+Spot  
**30+30** Flood+Flood  
**60+60** W.Flood+W.Flood  
**12+12** E.W.Flood+E.W.Flood  
**00+00** Diffused+Diffused

CUBIT is available in four sizes: 134, 114, 89 and 61 mm. One or two light outputs (from opposite sides of the cube) and seven different beam openings: Ultra Spot, Spot, Medium Flood, Wide Flood, Extra Wide Flood, Diffused and Asymmetric. The combination of symmetrical and asymmetrical optics increases the possible effects, and thanks to its minimalist form, CUBIT can be positioned freely on the wall.

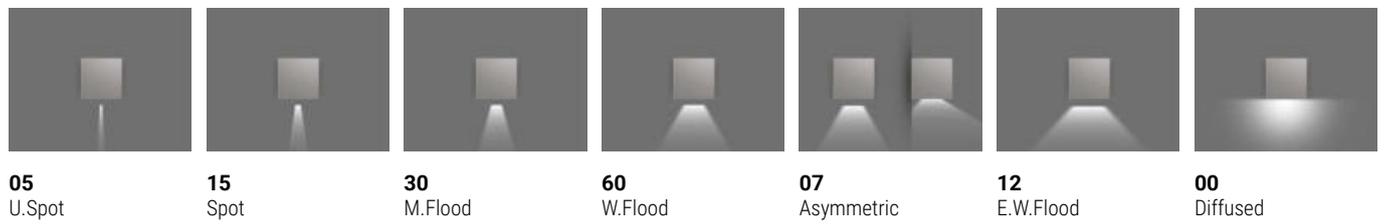

89x89x88 mm

61x61x60 mm

### OPTICS CUBIT PRO SINGLE EMISSION

Only for 61x61x60 mm

# COLOURS FOR ALL ARCHITECTURAL STYLES

CUBIT is available in five subtly neutral finishes, so it can blend in or stand out against any architecture. White, Grey, Black, Dark Brown and Primer are colours suitable for and adaptable to any context. The perfect neutrality of the chosen colours, together with the many lighting effects, make CUBIT a universal product, a true globetrotter of light.

**White**

**Grey**

**Black**

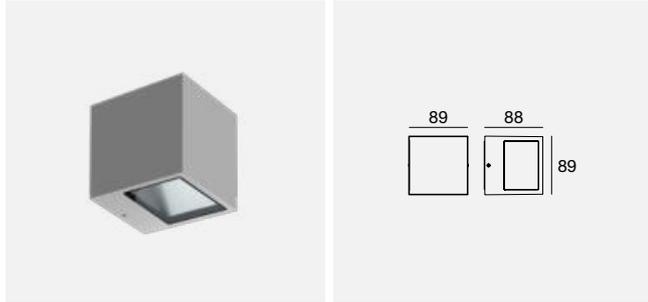

**Primer**

In addition to the four different finishes, Cubit is available in Primer finish so the fixture can be painted to match the architecture in which it is installed.

**Dark Brown**

## OPTICAL CELL **CUBIT PRO: RECESSED,** EFFICIENT AND HIGH-PERFORMATIVE

Designed for maximum comfort with black cell optics. This solution allows the optical compartment to be retracted, thus reducing the glare effect for improved visual comfort. Due to its special design, this optic can only be installed facing downwards.

Optic 05 powerLED

Optic Cell 15/30/60 only for downlight installation

Available from February 2023

**SKIN\_W**

# BEAUTIFUL BY DAY, EFFICIENT IN EVERY SITUATION BY NIGHT

We have expanded and completed the SKIN collection with the new wall-mounted version. The collection's innovative elongated hexagon shape is available in two widths: 160 and 210 mm, and in three light configurations: symmetrical, asymmetrical and diffused. SKIN W is an extremely versatile product thanks to the different optics and finishes available; its slim shape makes it adaptable to any context. Neutral colours have been chosen to work by assimilation or contrast with the wall surfaces on which they will be installed. SKIN W is a luminaire that interacts with the surrounding architecture. Combined with the SKIN series, it completes each project, giving it perfect aesthetic uniformity.

**Skin\_WF**  
145x160xP53

**Skin\_WF**  
145x210xP53

# SKIN\_W LIGHT HOW YOU WANT IT

SKIN W is the wall-mounted version of SKIN. Its compositional matrix is divided into two variants in mono or bi-emission mode. For each version, optics with different lighting effects are provided: with recessed cells, with opal diffuser and linear asymmetric. It has reduced dimensions: small 145x160x51 mm and large 145x210x51; thanks to its slim structure, it can be installed perfectly flush with the wall.

**Skin\_WF**  
Single Emission: 7W AC  
Optic: Spot, Flood, Medium Flood  
Double Emission: 7W+7W AC  
Optic: Spot, Flood, Medium Flood

Double Emission: 11W+11W AC  
Optic: Spot, Flood, Medium Flood

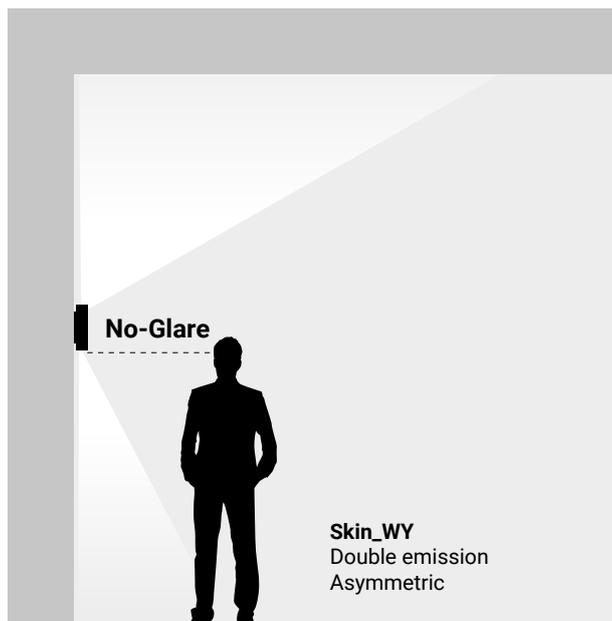

**Skin\_WL**  
Single Emission: 11W AC  
Optic: Diffused  
Double Emission: 11W+11W AC  
Optic: Diffused

**Skin\_WY**  
Single Emission: 11W AC  
Optic: Asymmetric  
Double Emission: 10,5W+10,5W AC  
Optic: Asymmetric

# ASYMMETRY MAKES THE DIFFERENCE

In the version with uplight asymmetrical optics, the beam is more open, allowing a greater light diffusion on the ceiling, an effect that is amplified in vaulted rooms; in the downlight version, the beam is narrower and the recessed optics maximise visual comfort, also thanks to the recessed cell optics.

## BLEND IN OR STAND OUT: PLAYING WITH FINISHES

SKIN W is available in five neutral finishes: White, Grey, Black Grey, Black and Dark Brown. These colours allow the designer to blend the product in with the surrounding architecture, making it almost invisible to the light, or in contrast, making SKIN W stand out. A solution that offers a dual advantage: it enhances the aesthetics of the luminaire and of its light.

Wall e Ceiling luminaires

# STADIUM

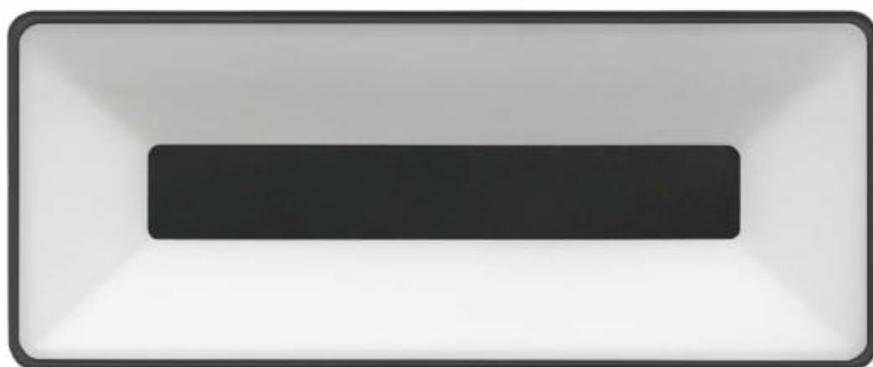

# WHEN LIGHT TAKES SHAPE

Stadium is an outdoor luminaire with IP65 protection rating that can be connected directly to the mains. Its soft and contemporary forms make Stadium an extremely practical solution that blends into any architectural context; the special retracted opal diffuser creates suggestive light effects and guarantees utmost visual comfort. The sturdy fixture with IK10 impact protection rating is made in anti-UV polycarbonate with a black or white finish; the central element in polypropylene is in the same colour as the fixture; inside, a 2700K, 3000K or 4000K LED circuit offers the highest performance and ease of maintenance.

**White**

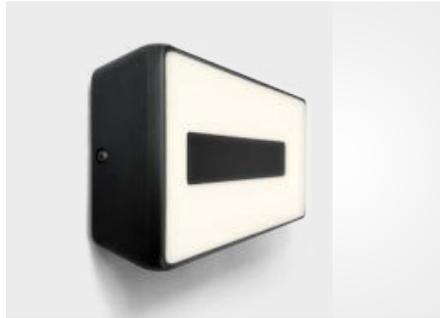

**Black**

# INSTALLATION CREATIVITY

Among the many benefits, one of the most significant is without a doubt its installation. Stadium offers various positioning possibilities, on the ceiling, directly on the wall, or with a special bracket on sloping walls. All this makes it easy to play with the light, creating different light effects and coordinating the overall look.

**Ceiling-mounted**

**Wall-mounted**

**Wall-mounted with bracket  
accessory**

## ILLUMINATE FROM OTHER POINTS OF VIEW

Using the special bracket accessory, Stadium can be installed in a tilted position, which in addition to making the luminaire particularly scenic, also directs the luminous flux downwards, thus accentuating walkways, paths, walls, or residential entrances.

## STADIUM FULL LIGHT: 360 LIGHT

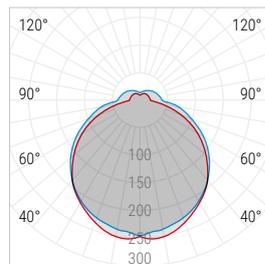

We have updated the STADIUM series with an innovative version with an opal structure for a wider and softer diffusion of light. This full light solution draws a generous halo of light around and behind the luminaire, increasing its efficiency and visibility. STADIUM full light is the evolution of the technical wall lamp in which aesthetics and functionality blend perfectly.

# AT THE SERVICE OF THE DESIGNER

A professional outdoor projector with IP66 protection rating, this luminaire can be directly connected to the mains. Thanks to its understated structure, it can be inserted in all design contexts with utmost discretion, perfectly blending in with the architecture.

**Design and installation, everything just got simpler.**

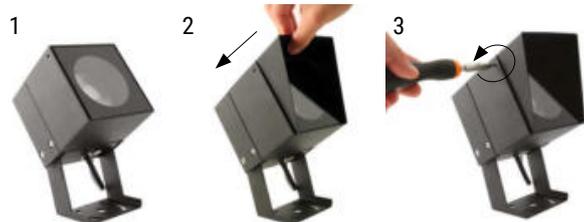

## A new optics group

The adjustable fixture is made from epoxy powder-coated die-cast aluminium in the finishes: white, black, grey, dark brown; the front is characterised by clear tempered glass with a black screen-printed edge; inside we find a new optics group with beam angles: Spot, Flood. The anti-glare accessories help further reduce the glare for significantly enhanced visual comfort.

# OUTDOOR ACCESSORIES ANTI-GLARE

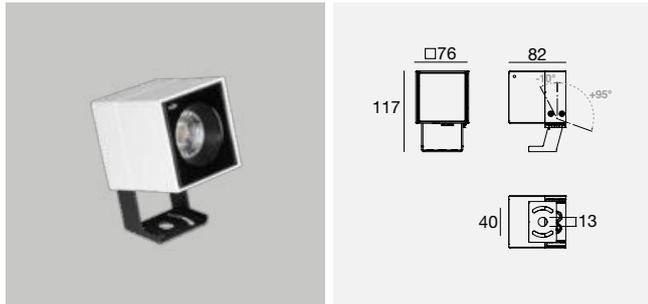

Anti-glare accessories are conceived to reduce light glare. These accessories are made of black painted aluminium.

# VARIABLE DYNAMIC OPTICS

By turning the built-in ring nut, it is possible to adjust the width of the light beam, from a 10° angle up to a 60° angle.

"I've missed  
I've lost  
26 times,

more than 9000 shots in my career.  
almost 300 games.  
I've been trusted to take the game  
winning shot and missed  
failed over and over and over again in my life.  
And that is why I succeeded."

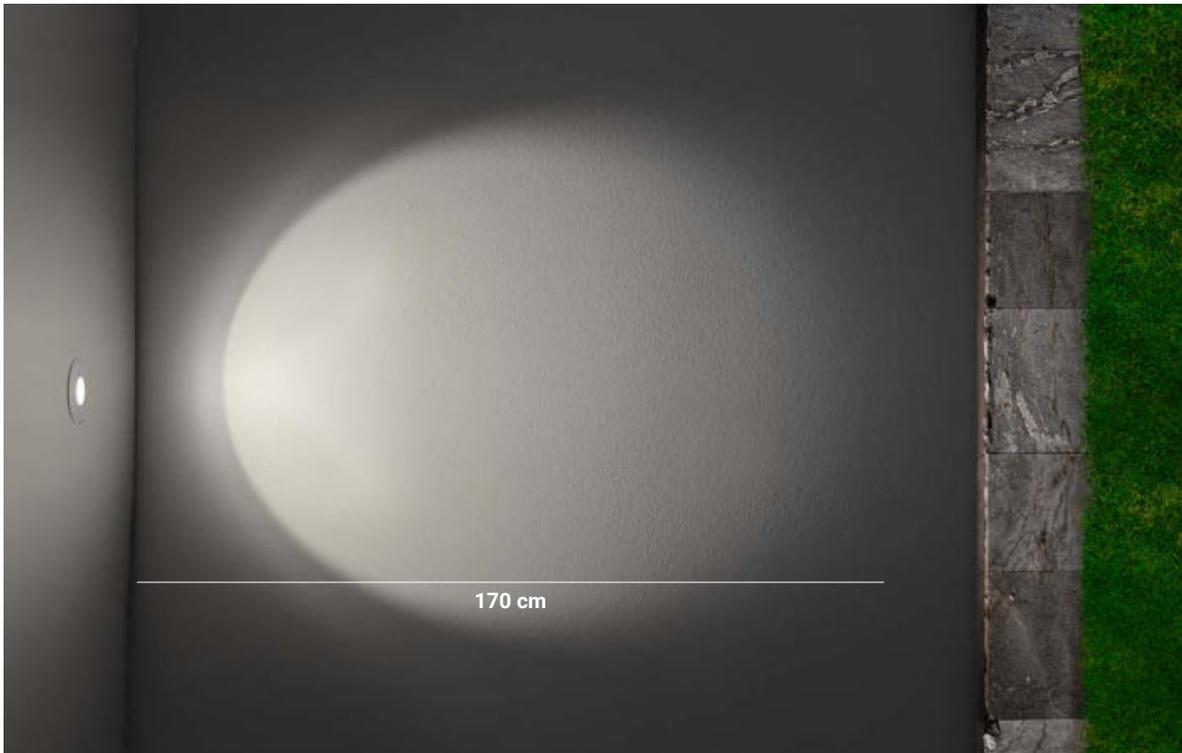

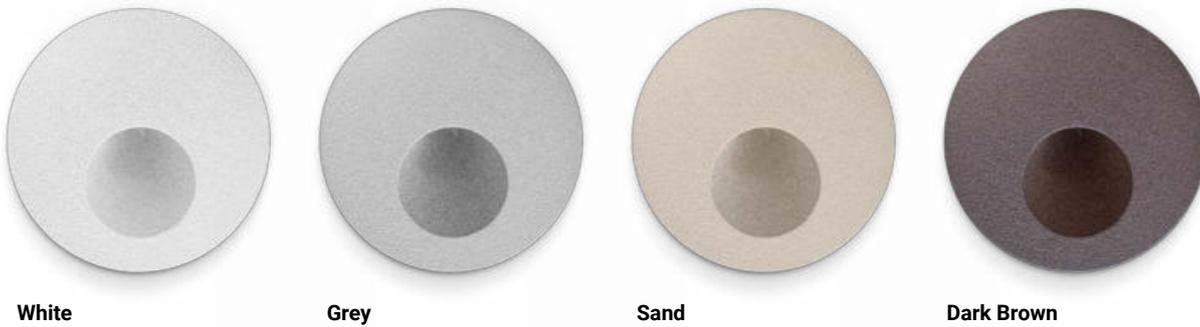

MICHAEL JORDAN

**QUARA\_RO**

# HIGH DEFINITION LIGHTING

The new circular aperture creating a light beam with extremely well-defined edges complements and completes the Quara series. The perfect shaping of the light on the ground creates striking graphic effects. Thanks to the IP65 protection rating and dedicated finishes, it is the ideal step light for contemporary outdoor settings. Quara RO is available in three diameters: Ø25, Ø40 and Ø70 mm and four colours: White, Grey, Dark Brown and Sand.

# COMPACT, COMFORTABLE, SPECTACULAR

A drop of light in a square or round lamp body: Quara, a marker light with an IP65 protection rating which, when installed close to the floor, illuminates and decorates in a classy and tasteful manner thanks to its asymmetrical optics. Suitable to illuminate paths, stairs and steps. Supplied with a power supply built into the luminaire, it is therefore possible to connect Quara directly to the power line.

# A MARKER LIGHT THAT REVEALS ITSELF

Step revolutionises the idea of marker light, by integrating the power supply into a miniature case, with an IP65 protection rating, and providing an intense and high-performing light. It has a soft asymmetrical emission, thanks to the shallow optical chamber, which emphasises the illuminated parts of the floor. Available in four finishes, chrome, white, grey and dark brown, it can be installed in plasterboard or masonry walls using the special template.

# STEP FULL LIGHT: HIGH VISIBILITY AND BRIGHTNESS STEPLIGHT

Step66 Full Light is the new frontier in step lights. The collection has been expanded with a version providing high visibility and brightness thanks to the halo effect of the translucent frame. The use of a removable support makes installation easier and simpler. The asymmetrical optic projects a light beam with perfectly defined contours; the high visibility Step66 Full Light marks out paths and walkways.

# ENVELOPE\_RW

INTEGRATED DRIVER

# ENVELOPE\_RW, NOW THE DRIVER IS ENCLOSED IN JUST 28 MILLIMETRES

The Envelope\_RW family has been joined by a new round marker light with driver built into the structure, which protrudes by just 28 mm and can be connected directly to the mains. It appears as a single compact element, with a clean, minimalist appearance; the pure geometric shapes gently illuminate the space, creating an evocative sense of depth both indoors and outdoors. Available in four finishes: White, Grey, Black Grey, Dark Brown; two colour temperatures: 3000K and 4000K; and two powers: 1.6W for a softer effect and 2.5W for a more incisive effect.

White

Grey

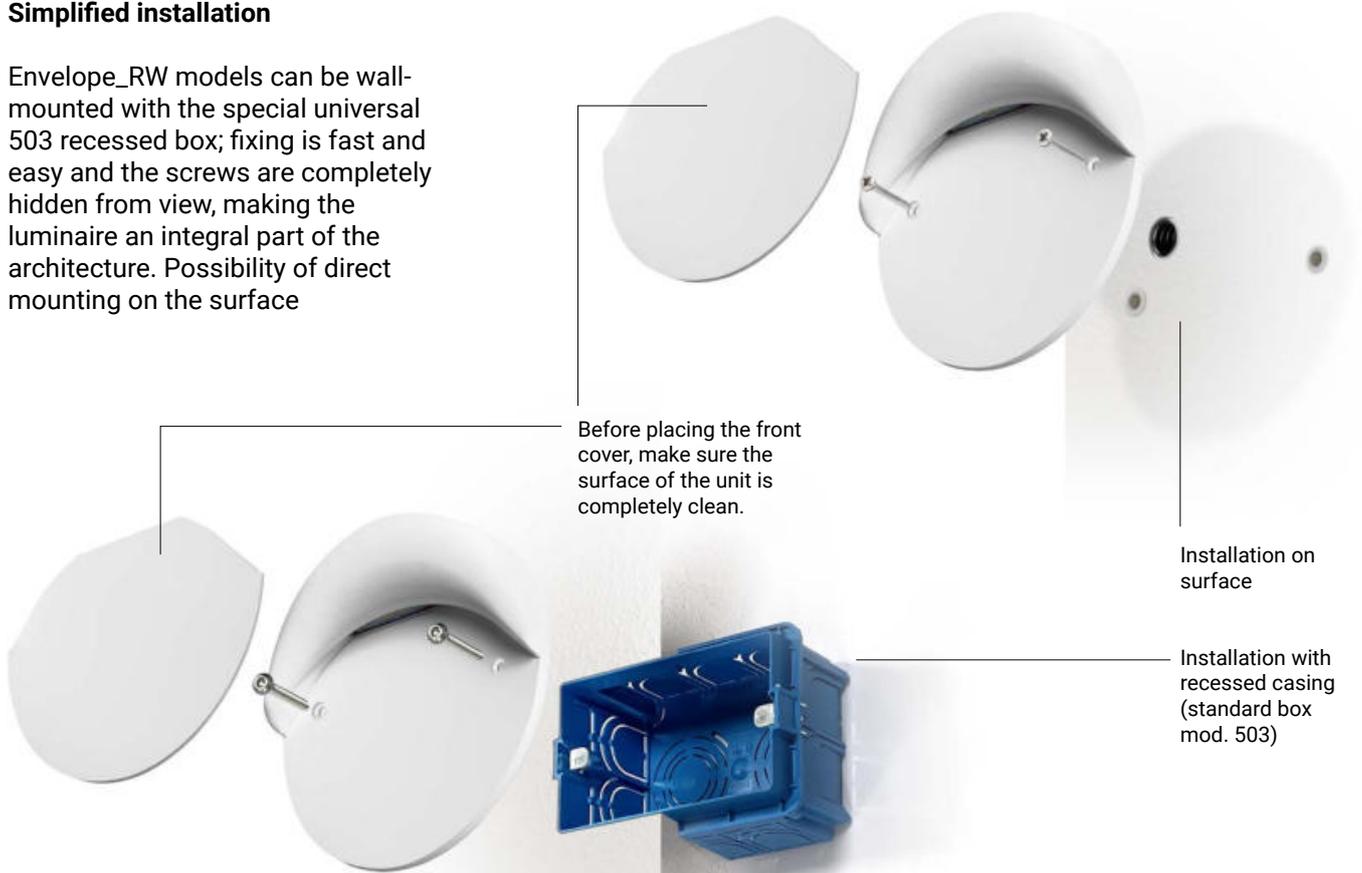

Black Grey

Dark Brown

## Simplified installation

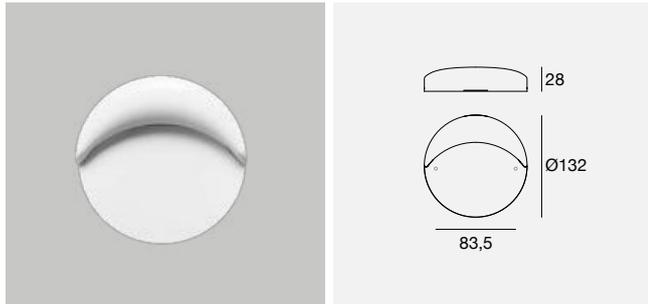

Envelope\_RW models can be wall-mounted with the special universal 503 recessed box; fixing is fast and easy and the screws are completely hidden from view, making the luminaire an integral part of the architecture. Possibility of direct mounting on the surface

Before placing the front cover, make sure the surface of the unit is completely clean.

Installation on surface

# ENVELOPE

# ELEGANCE AND QUINTESSENCE IN JUST 13 MILLIMETRES

The Envelope family is renewed with new powers, and Envelope\_R is joined by a new round path marker that appears as a single, compact element, just 13 millimetres in size, featuring a clean and pared-back look. The pure geometric forms gently illuminate the space creating a suggestive sense of depth both indoors and outdoors. It is available in four finishes, white, grey, black grey, dark brown, two colour temperatures, 3000K and 4000K, and two powers, 1.5W for a softer effect, and 4W for a more incisive effect.

## Recessed optics and visual comfort

The recessed source is hidden from view, making it a full cut-off luminaire: the eye sees and appreciates only the clean and comfortable emission; in a slightly asymmetrical position, it directs the beam towards the walking area.

## Simplified installation

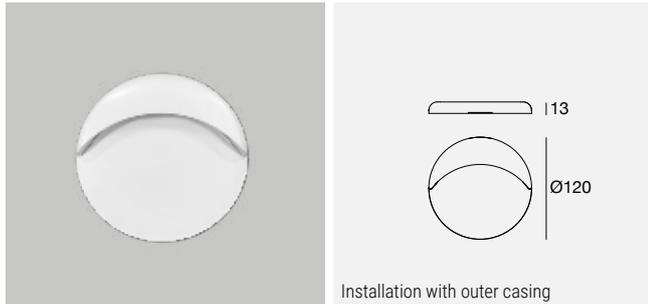

The Envelope\_R and Envelope\_Q models can be wall-mounted using the special 503 flush-mounted box; installation is simple and fast, and the screws are completely hidden from view making the luminaire one with the architecture.

The Envelope\_QW model can be fixed directly on the surface using the special bracket supplied with the product, without the use of a flush-mounted box.

# OPTIWALL

# A CASCADE OF LIGHT IN A FEW MILLIMETRES OF THICKNESS

The OPTIWALL is an innovative marker light with no casing and only 18 mm thick to contain the light sources. Available in two formats, square and rectangular, and three sizes: 160x160, 160x84 and 295x84 mm. It is the ideal luminaire for outdoor walkways or stairs, and it is easy to install. The recessed light sources, thanks to the large flat diffuser underneath, diffuse a copious cascade of light on both horizontal and vertical surfaces. OPTIWALL, indoor and outdoor, is certified Bug Rating 0.

# SPECTACULAR LIGHTS TO MARK A PATH

Alcor is a range of extremely compact recessed marker lights, with an IP67 protection rating. The power supply is built into the structure, so they can be connected directly to the power line, making installation easier. The body is made of AISI 316 L steel and they have a load capacity of up to 2000 kg. They are available in two shapes, round or square, with a 180° window, narrow window, 2 windows or 4 windows, which allow you to mark a path with fascinating lighting effects.

# ASTROPEK

220-240 V

# ONE, TWO OR FOUR: SUITABLE FOR ANY PATH

Astropek has been revamped to expand its installation potential. Thanks to the special base, it can be placed in even the most sensitive and complex settings, such as historical town centres. The innovative truncated, tapered base makes it easier and faster to position while the cabling does not require an outer casing. The fixture can be connected directly to the mains power supply and is designed with a LED light source for high-efficiency and brightness. Astropek can be driven on and withstand weights of up to 2,500 kg. It is available with one, two or four emission uplights.

# FOOTPAD

# FOOTPAD IS THE ULTRA-FLAT SURFACE MARKER LIGHT WITH 360° LIGHTING

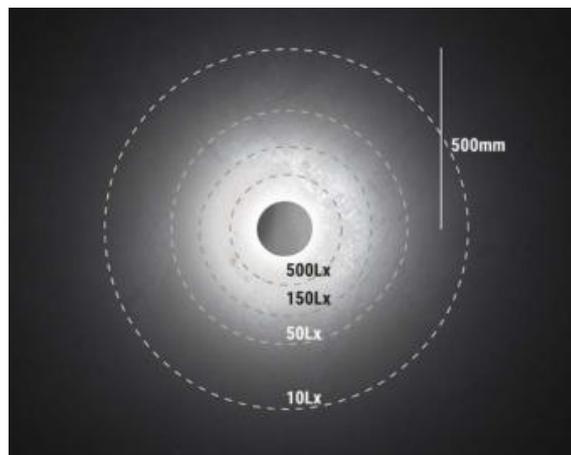

A series of IP67 floor-mounted luminaires, characterised by an ultra-flat AISI 316 stainless steel structure, with a projection of just 20 mm. Available in two shapes and two electrifications, it is designed for 360° grazing lighting above the ground, suitable for illuminating passageways and at the same time creating striking lighting effects. Footpad is installed directly on the surface without the need for casings; the strong and reliable materials guarantee an IK10 impact resistance rating.

**BUZZER**

# A NEW BOLLARD THAT REVOLUTIONISES THE CONCEPT OF VISUAL COMFORT WITH WRAPAROUND LIGHTING AND NO SHADOW AREAS

Buzzer is the new bollard designed to illuminate routes, whether pedestrian or vehicle, and contemporary landscape projects. Available in four heights and three diameters, it is a flexible outdoor device, ideal for meeting all the designer's requirements. The light source, located entirely under the head, ensure Buzzer's excellent anti-glare, visual comfort. The bollard illuminates on the ground with 2 openings (180°) or a single opening (360°) with no upward dispersion. Thanks to its special optics, it offers a wide light diffusion all around it with no shadow areas at the base. Buzzer comes in three neutral finishes which are perfect for outdoor installation: Grey, Black Grey and Dark Brown. Available in four temperature colours: 2200K, 2700K, 3000K and 4000K.

**MK68**

# MK68 TAKES A LEAP FORWARD

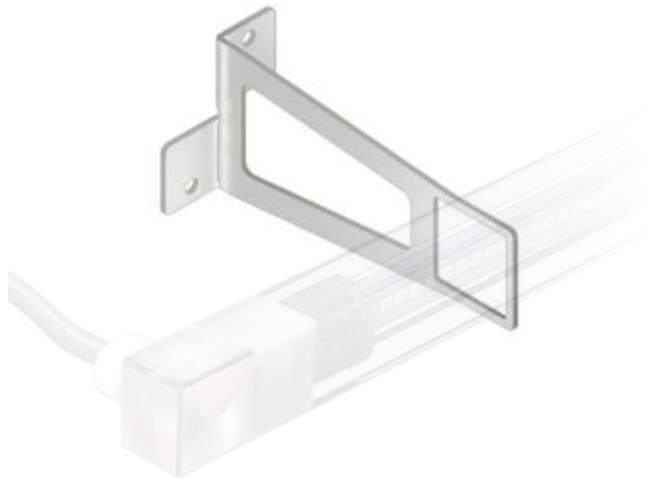

MK68 is an adjustable underwater luminaire with IP68 protection rating, designed to create special light effects in swimming pools, water baths or fountains. The revolutionary ZeroAir system definitively prevents the development of humidity inside the product. Available in two sizes with round or square section, two power ratings and with a new Flood optic. The fixture is in polycarbonate with closing elements in AISI 316L stainless steel, and the special structure ensures MK68 is able to resist up to 25 metres in depth.

# NO FLEX

MK68 is completed by a new accessory specifically for the 1290mm length. Available for the round and square section, when positioned centrally, it prevents the device from flexing when it is installed under a waterfall, for example. The accessory is included in the MK68\_R 82644, 82648 and MK68\_Q 82652, 82656 models.

Central support bracket included for  
MK68\_R code 82644 – 82648

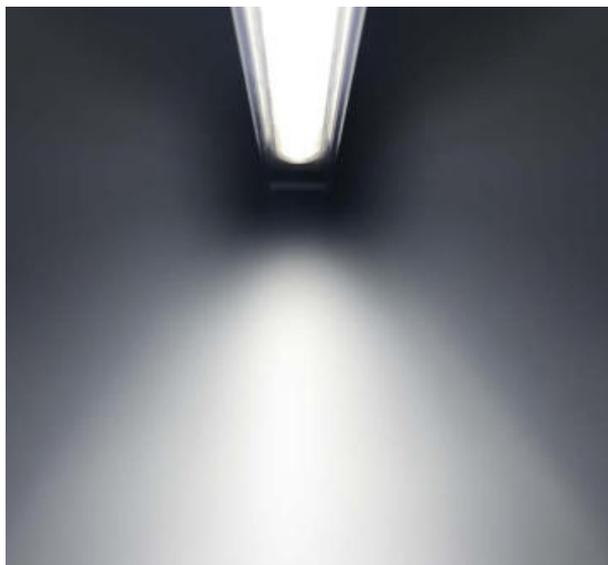

Central support bracket included for  
MK68\_Q code 82652 – 82656

## A FLOOD OPTIC TO GO DEEP

MK68 retains its excellent technical features and is enhanced with a new Flood optic, 30° for the version with round section, and 39° for the version with square section.

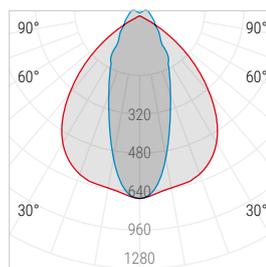

## COMPARISON BETWEEN NEW FLOOD 30 OPTIC AND DIFFUSED 36 OPTIC

# MK68 FITS SEAMLESSLY INTO THE STRUCTURE WITH THE NEW OUTER CASING

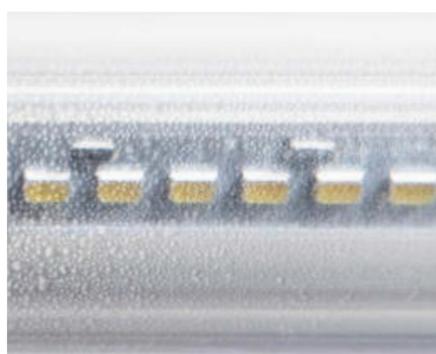

The outer casing in AISI 316L stainless steel allows an additional recessed installation option for MK68. Designers now have an extra solution to create special underwater light effects in swimming pools, pools or fountains. The integrated bracket has been designed to allow easy installation and removal of the device, especially during maintenance and cleaning operations. The outer casing is available for the Mk68\_R and MK68\_Q models with the 694 mm and 1290 mm length.

# ZEROAIR SYSTEM: LONG LIFE FOR MK68

ZeroAir System

Without ZeroAir System

Thanks to the experience gained in the design of immersion fixtures, Linea Light Group has realized a special system called ZeroAir, which definitively solves the formation of moisture inside the product, so as to preserve the LED circuit from the generation of condensation.

# RAPTOR

# DESIGNED FOR WORK

By providing excellent light quality and high lighting performance, is the ideal solution for industrial and commercial lighting. Thanks to its high mechanical strength and ease of installation, it is suitable for large production and logistics spaces.

# STRENGTH AND PERFORMANCE IN ANY SETTING

Raptor has been revamped and upgraded. The new light has a single high-performance die-cast aluminium body with low copper content, a structural material that ensures good anti-corrosion properties and excellent thermal performance. It comes with COB LED and SMD Top LED light sources. In the first, the optics are single and parabolic with 130W, 150W and 180W power. The diffuser is made of extra-clear tempered glass and can be installed in harsh environments with exposure to chemicals, acids, halides, solvents, grease and oil.

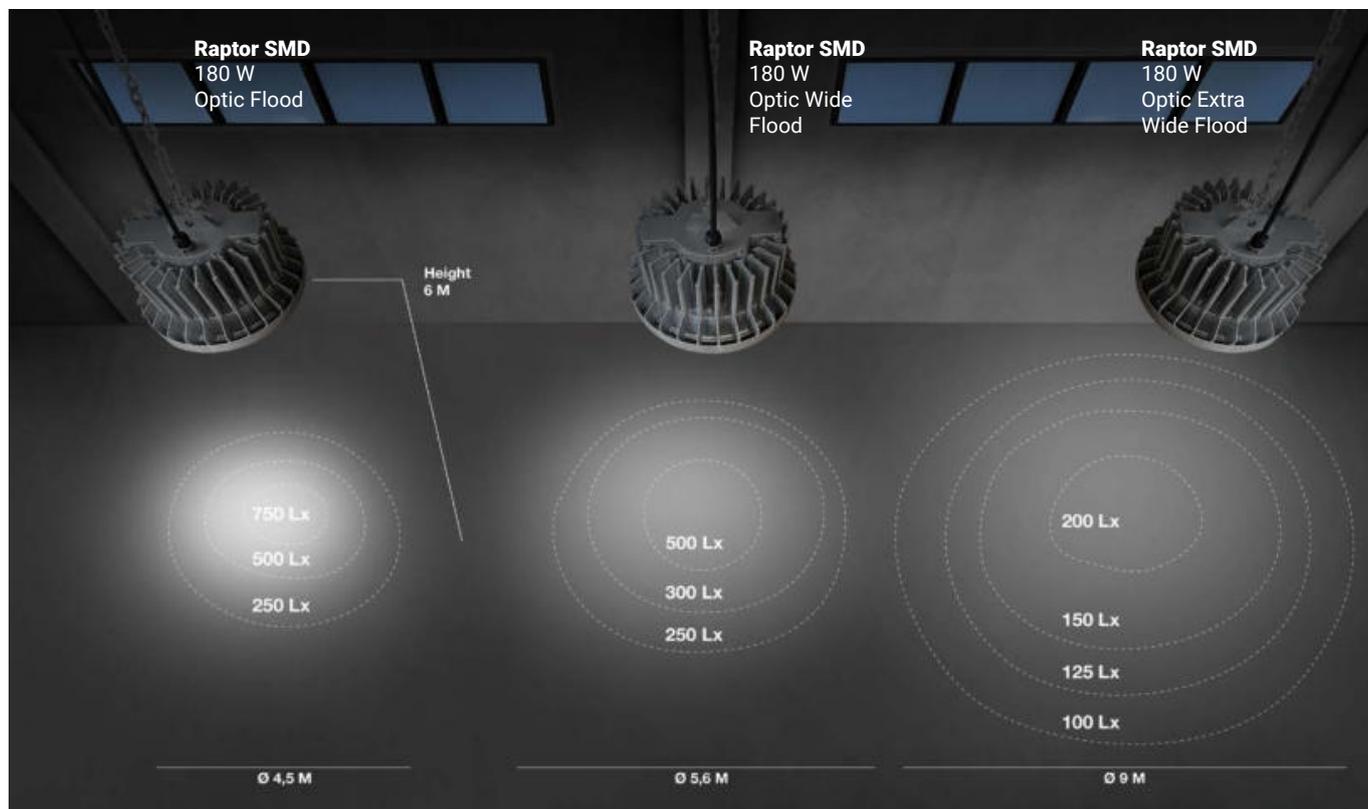

Polycarbonate  
diffuser for versions  
with optic code 30 and  
60, suitable for the  
food sector.  
(SMD Top Led version)

130W  
150W  
180W

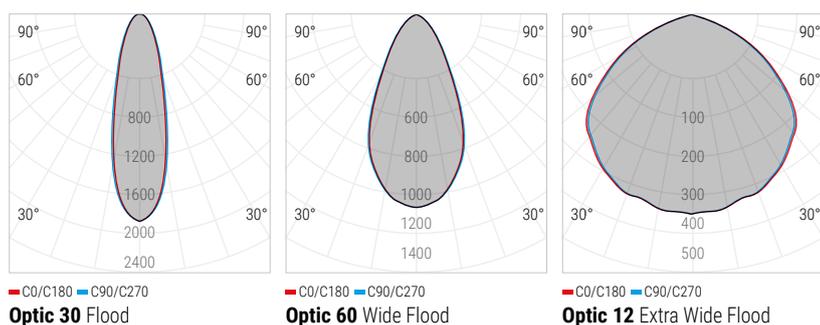

# SMD TOP LED

In the SMD Top LED version, the power varies from 130W to 180W. Both solutions are available with three temperature colours: 3000K, 4000K, 5000K and include On/Off, DALI or Twil® controls.

## OPTIC ELLIPTIC (88)

The fixtures with optic 88 have a double attachment fastening system. This means that the light fixtures can be suspended by chains while maintaining the direction of the light beam. The clear glass diffuser is tempered with a ridged pattern.

# SELF-ADJUSTING AND COMPACT URBAN LIGHT

We have expanded the Parker family with a new compact version, measuring just 270x200 mm. The configuration possibilities offer excellent adaptability to a variety of urban and suburban settings. Three optics complement Parker's potential: Street, Urban and Park with asymmetric light distribution designed to respond to different settings. The fixture can be adjusted in steps of 5° to achieve different angles. This flexibility makes it easy to position and adjust horizontally. It can also be placed on the wall using the special bracket. We offer two management and control solutions: On/Off and with Autocontrol System® technology. This is an integrated system designed to make the street light autonomous and to adjust itself based on the programming selected for daily lighting requirements. The fixture can be adjusted in steps of 5° to achieve different angles. This flexibility makes it easy to position and adjust horizontally. It can also be placed on the wall using the special bracket accessory.
